WESCO FINANCIAL CORPORATION LETTER TO SHAREHOLDERS

To Our Shareholders:

Consolidated net “operating” income (i.e., before realized investment gains shown in the table below) for the calendar year 2007 increased to \$93,405,000 (\$13.12 per share) from \$92,033,000 (\$12.93 per share) in the previous year.

Consolidated net income increased, from \$92,033,000 (\$12.93 per share) in 2006, to \$109,161,000 (\$15.33 per share) in the current year. The 2007 figure included realized investment gains of \$15,756,000, after taxes (\$2.21 per share).

Wesco has four major subsidiaries: (1) Wesco-Financial Insurance Company (“Wes-FIC”), headquartered in Omaha and engaged principally in the reinsurance business, (2) The Kansas Bankers Surety Company (“Kansas Bankers”), owned by Wes-FIC and specializing in insurance products tailored to midwestern banks, (3) CORT Business Services Corporation (“CORT”), headquartered in Fairfax, Virginia and engaged principally in the furniture rental business, and (4) Precision Steel Warehouse, Inc. (“Precision Steel”), headquartered in Chicago and engaged in the steel warehousing and specialty metal products businesses.

Consolidated net income for the two years just ended breaks down as follows (in thousands except for per-share amounts)⁽¹⁾:

	Year Ended			
	December 31, 2007		December 31, 2006	
	Amount	Per Wesco Share ⁽²⁾	Amount	Per Wesco Share ⁽²⁾
Operating earnings:				
Wesco-Financial and Kansas Bankers insurance businesses —				
Underwriting	\$ 7,040	\$.99	\$ 5,164	\$.73
Investment income	65,207	9.16	58,528	8.22
CORT furniture rental business	20,316	2.85	26,884	3.78
Precision Steel businesses	915	.13	1,211	.17
All other “normal” net operating earnings (loss) ⁽³⁾	(73)	(.01)	246	.03
	<u>93,405</u>	<u>13.12</u>	<u>92,033</u>	<u>12.93</u>
Realized investment gains	15,756	2.21	—	—
Wesco consolidated net income	<u>\$109,161</u>	<u>\$15.33</u>	<u>\$92,033</u>	<u>\$12.93</u>

(1) All figures are net of income taxes.

(2) Per-share data are based on 7,119,807 shares outstanding. Wesco has no dilutive capital stock equivalents.

(3) Represents income from ownership of the Wesco headquarters office building, primarily leased to outside tenants, and interest and dividend income from cash equivalents and marketable securities owned outside the insurance subsidiaries, less interest and other corporate expenses.

This supplementary breakdown of earnings differs somewhat from that used in audited financial statements which follow standard accounting convention. The foregoing supplementary breakdown is furnished because it is considered useful to shareholders. The

total consolidated net income shown above is, of course, identical to the total in our audited financial statements.

Insurance Businesses

Consolidated operating earnings from insurance businesses represent the combination of the results of their insurance underwriting (premiums earned, less insurance losses, loss adjustment expenses and underwriting expenses) with their investment income. Following is a summary of these figures as they pertain to all insurance operations (in 000s).

	<u>Year Ended December 31,</u>	
	<u>2007</u>	<u>2006</u>
Premiums written	\$ 54,839	\$55,510
Premiums earned	<u>\$ 54,411</u>	<u>\$54,149</u>
Underwriting gain	\$ 10,831	\$ 7,944
Dividend and interest income	<u>89,716</u>	<u>83,441</u>
Income before income taxes	100,547	91,385
Income taxes	<u>28,300</u>	<u>27,693</u>
Total operating income — insurance businesses	<u>\$ 72,247</u>	<u>\$63,692</u>

Following is a breakdown of premiums written (in 000s):

Wes-FIC reinsurance	\$ 35,346	\$35,710
Kansas Bankers primary insurance	<u>19,493</u>	<u>19,800</u>
Premiums written	<u>\$ 54,839</u>	<u>\$55,510</u>

Following is a breakdown of premiums earned (in 000s):

Wes-FIC reinsurance	\$ 34,998	\$33,323
Kansas Bankers primary insurance	<u>19,413</u>	<u>20,826</u>
Premiums earned	<u>\$ 54,411</u>	<u>\$54,149</u>

Following is a breakdown of after-tax results (in 000s):

Underwriting gain —		
Wes-FIC	\$ 1,403	\$ 1,650
Kansas Bankers	<u>5,637</u>	<u>3,514</u>
	<u>7,040</u>	<u>5,164</u>
Net investment income —		
Wes-FIC	59,906	53,732
Kansas Bankers	<u>5,301</u>	<u>4,796</u>
	<u>65,207</u>	<u>58,528</u>
Total operating income — insurance businesses	<u>\$ 72,247</u>	<u>\$63,692</u>

As shown above, operating income includes significant net investment income, representing dividends and interest earned from marketable securities. However, operating income excludes investment gains of \$15.8 million, net of income taxes, realized in 2007.

No investment gains or losses were realized in 2006. The discussion below will concentrate on insurance underwriting, not on the results from investments.

Wes-FIC engages in the reinsurance business. For the past several years, its reinsurance activity has consisted of the participation in several risk pools managed by an insurance subsidiary of Berkshire Hathaway, our 80%-owning parent. The arrangement became effective in 2001 and most recently covered hull, liability and workers' compensation exposures relating to the aviation industry, as follows: for 2006, to the extent of 12½% of the hull and liability pools and 5% of the workers' compensation pool; for 2007, 16.67% of the hull and liability pools and 5% of the workers' compensation pool. The participation rates remain unchanged for 2008. The Berkshire subsidiary provides a portion of the upper-level reinsurance protection to these aviation risk pools on terms that could result in the Berkshire subsidiary having a different interest from that of Wes-FIC under certain conditions, e.g., in settling a large loss.

Wesco's Board of Directors has recently and enthusiastically approved Wes-FIC's most significant reinsurance contract to date: its participation, since January 1, 2008, in an agreement with National Indemnity Company ("NICO"), another Berkshire Hathaway insurance subsidiary, for the assumption of 10% of NICO's quota-share reinsurance of Swiss Reinsurance Company and its property-casualty affiliates ("Swiss Re"). Under this retrocession agreement, Wes-FIC will effectively assume 2% of all of Swiss Re's property-casualty risks incepting over the next five years on the same terms as NICO's agreement with Swiss Re. If recent years' volumes were to continue over the next five years, the annual written premiums assumed by Wes-FIC under this retrocession agreement would be in the \$300 million range; however, actual premiums assumed over the five-year period could vary significantly depending on market conditions and opportunities.

It is the nature of even the finest casualty insurance businesses that in keeping their accounts they must estimate and deduct all future costs and losses from premiums already earned. Uncertainties inherent in this undertaking make financial statements more mere "best honest guesses" than is typically the case with accounts of non-insurance-writing corporations. The reinsurance portion of the casualty insurance business, because it contains one or more extra links in the loss-reporting chain, usually creates more accounting uncertainty than in the non-reinsurance portion. Wesco shareholders should remain aware of the inherent imperfections of Wes-FIC's accounting, based as it is on forecasts of outcomes in many future years.

Wes-FIC's underwriting results have typically fluctuated from year to year, but have been satisfactory. When stated as a percentage, the sum of insurance losses, loss adjustment expenses and underwriting expenses, divided by premiums, gives the combined ratio. The combined ratios of Wes-FIC have been much better than average for insurers. Wes-FIC's combined ratios were 93.9% for 2007 and 94.0% for 2006. We try to create some underwriting gain as results are averaged out over many years. We expect this to become increasingly difficult.

Float is the term for money we hold temporarily, and as long as our insurance underwriting results are break-even or better, it costs us nothing. We expect that the new business venture with NICO will significantly increase Wes-FIC's float from its yearend 2007 balance of \$94 million, thus providing additional opportunities for investment.

Kansas Bankers was purchased by Wes-FIC in 1996 for approximately \$80 million in cash. Its tangible net worth now exceeds its acquisition price, and it has been a very

satisfactory acquisition, reflecting the sound management of President Don Towle and his team.

Kansas Bankers was chartered in 1909 to underwrite deposit insurance for Kansas banks. Its offices are in Topeka, Kansas. Over the years its service has continued to adapt to the changing needs of the banking industry. Today its customer base, consisting mostly of small- and medium-sized community banks, is spread throughout 38 mainly midwestern states. In addition to bank deposit guaranty bonds which insure deposits in excess of FDIC coverage, KBS offers directors and officers indemnity policies, bank employment practices policies, bank insurance agents professional errors and omissions indemnity policies and Internet banking catastrophe theft insurance.

When Wesco purchased KBS, it had been ceding almost half of its premium volume to reinsurers. Now it reinsures only about 15%. Effective in 2006, insurance subsidiaries of Berkshire Hathaway became KBS's sole reinsurers. Previously, an unaffiliated reinsurer was also involved. The increased volume of business retained comes, of course, with increased irregularity in the income stream. KBS's combined ratios were 55.1% for 2007 and 73.8% for 2006. We continue to expect volatile but favorable long-term results from KBS.

CORT Business Services Corporation ("CORT")

In February 2000, Wesco purchased CORT Business Services Corporation ("CORT") for \$386 million in cash.

CORT is a very long-established company that is the country's leader in rentals of furniture that lessees have no intention of buying. In the trade, people call CORT's activity "rent-to-rent" to distinguish it from "lease-to-purchase" businesses that are, in essence, installment sellers of furniture.

However, just as Enterprise, as a rent-to-rent auto lessor in short-term arrangements, must be skilled in selling used cars, CORT must be and is skilled in selling used furniture.

CORT's revenues totaled \$396 million for calendar 2007, versus \$400 million for calendar 2006. Of these amounts, furniture rental revenues were \$327 million and \$324 million, furniture sales revenues were \$62 million and \$70 million, and rental relocation revenues were \$7 million and \$6 million. CORT operated at after-tax profits of \$20.3 million for 2007 and \$26.9 million for 2006.

When we purchased CORT early in 2000, its furniture rental business was rapidly growing, reflecting the strong U.S. economy, phenomenal business expansion and explosive growth of IPOs and the high-tech sector.

Beginning late in 2000, however, new business coming into CORT began to decline. With the burst of the dot-com bubble, the events of September 11, and a protracted slowdown in new business formation, CORT's operations were hammered, reflecting generally bad results in the "rent-to-rent" segment of the furniture rental business. Obviously, when we purchased CORT we were poor predictors of near-term industry-wide prospects of the "rent-to-rent" sector of the furniture business.

CORT started up a new service in 2001. Originally a subsidiary named Relocation Central, and subsequently integrated into CORT's operations, CORT's rental relocation activities were intended mainly to supplement its furniture rental business by providing apartment locator and ancillary services to relocating individuals. Long CORT's star CEO, Paul Arnold is in process of expanding CORT's rental relocation services and redirecting its

marketing toward the needs of businesses and governmental agencies who require a skilled and able partner to provide comprehensive and seamless relocation services for the temporary relocation of employees, worldwide. With several websites, principally www.cort.com, www.relocationcentral.com and www.apartmentsearch.com, professionals in more than 80 domestic metropolitan markets, affiliates in more than 50 countries, almost twenty thousand apartment communities referring their tenants to CORT, many ancillary services, and its entrée to the business community as a Berkshire Hathaway company, CORT's rental relocation operations may now be moving in the right direction.

In January 2008, CORT expanded its operations to the United Kingdom through the purchase of Roomservice Group, a small regional provider of furniture rental and relocation services.

CORT's operations are subject to economic cycles. We are pleased with CORT's progress in the past few years; however, we believe that it will likely suffer its share of the downturn as we enter a period of economic contraction. CORT is now a stronger company than it was when acquired by Wesco, helped by several "tuck-in" acquisitions, and poised towards long-term growth despite periodic bumps to be encountered along the way.

More details with respect to CORT are contained throughout this annual report, to which your careful attention is directed.

Precision Steel Warehouse, Inc. ("Precision Steel")

The businesses of Wesco's Precision Steel subsidiary, headquartered in the outskirts of Chicago at Franklin Park, Illinois, operated at after-tax profits of \$0.9 million in 2007 and \$1.2 million in 2006. These figures reflect after-tax LIFO inventory accounting adjustments decreasing after-tax income by \$1.0 million for 2007 and \$0.6 million for 2006. Precision Steel's operating results for 2006 also reflect expenses, net of insurance recoveries, of \$0.3 million, after taxes, in connection with environmental cleanup of an industrial park where a Precision Steel subsidiary has operated alongside approximately 15 other manufacturers for many years. Had it not been for the LIFO accounting adjustments, or the environmental matter discussed in Note 9 to the accompanying consolidated financial statements, Precision Steel would have reported after-tax operating income of \$1.9 million for 2007 and \$2.1 million for 2006.

Precision Steel's business has been subject to economic cycles. Although the fiercely competitive, chaotic pressures which affected its steel service center business several years ago have abated, Precision Steel is continuing to suffer the ongoing effects of a long-term reduction in demand caused by customers' (or former customers') unsuccessful competition with manufacturers outside the United States. Precision Steel's revenues decreased 2.7% in 2007, following an increase of 2.8% in 2006, approximately half of which was due to an extraordinary order of shimstock and other industrial supplies from a customer of its Precision Brand Products subsidiary. In 2007, Precision Steel's service center volume was 39 million pounds, down from 46 million pounds in 2006 and 69 million pounds sold as recently as 1999. This decline in physical volume is a serious reverse, not likely to disappear in some "bounce back" effect. Nor do we expect that ongoing price increases like the approximately 66% rise that has occurred since 1999, holding dollar volume roughly level despite a precipitous drop in physical volume, will continue.

Although Precision Steel's recent after-tax operating *earnings* of approximately \$1 million per year may signal improvement when compared with its after-tax operating *loss* of

\$0.9 million for 2003, we do not consider present operating results to be a satisfactory investment outcome. Recent earnings of Precision Steel compare unfavorably with operating earnings which averaged \$2.3 million, after taxes, for the years 1998 through 2000. Because the steel warehouse business may revert to even more difficult conditions, more decline for Precision Steel may lie ahead.

Terry Piper, who became Precision Steel's President and Chief Executive Officer in 1999, has done an outstanding job in leading Precision Steel through very difficult years. But he has no magic wand with which to compensate for competitive losses among his best customers.

Tag Ends from Savings and Loan Days

All that now remains outside Wes-FIC but within Wesco as a consequence of Wesco's former involvement with Mutual Savings, Wesco's long-held savings and loan subsidiary, is a small real estate subsidiary, MS Property Company, that holds tag ends of appreciated real estate assets consisting mainly of the nine-story commercial office building in downtown Pasadena, where Wesco is headquartered. Adjacent to that building is a parcel of land on which our construction of a multi-story luxury condominium building is nearing completion. We are also seeking city approval of our plans to build another multi-story luxury condominium building, at a later date, on a vacant parcel of land in the next block. For more information, if you want a very-high-end condominium, simply phone Bob Sahn (626-585-6700). MS Property Company's results of operations, immaterial versus Wesco's present size, are included in the breakdown of earnings on page 1 within "other operating earnings."

Other Operating Earnings (Loss)

Other operating earnings (loss), net of interest paid and general corporate expenses, amounted to (\$0.1 million) in 2007, versus \$0.2 million in 2006. The components of the \$0.1 million of other operating loss in 2007 were (1) rents (\$3.9 million gross in 2007) principally from Wesco's Pasadena office property (leased almost entirely to outsiders, including Citibank as the ground floor tenant), and (2) interest and dividends from cash equivalents and marketable securities held outside the insurance subsidiaries, less (3) general corporate expenses plus minor expenses involving tag-end real estate.

Consolidated Balance Sheet and Related Discussion

Wesco carries its investments at fair value, with unrealized appreciation, after income tax effect, included as a separate component of shareholders' equity, and related deferred taxes included in income taxes payable, on its consolidated balance sheet. As indicated in the accompanying financial statements, Wesco's net worth, as accountants compute it under their conventions, increased to \$2.53 billion (\$356 per Wesco share) at yearend 2007 from \$2.40 billion (\$337 per Wesco share) at yearend 2006. The main causes of the increase were net operating income after deduction of dividends paid to shareholders, and appreciation in fair value of investments.

The foregoing \$356-per-share book value approximates liquidation value assuming that all Wesco's non-security assets would liquidate, after taxes, at book value.

Of course, so long as Wesco does not liquidate, and does not sell any appreciated securities, it has, in effect, an interest-free "loan" from the government equal to its

deferred income taxes of \$322 million, subtracted in determining its net worth. This interest-free “loan” from the government is at this moment working for Wesco shareholders and amounted to about \$45 per Wesco share at yearend 2007.

However, some day, parts of the interest-free “loan” may be removed as securities are sold. Therefore, Wesco’s shareholders have no perpetual advantage creating value for them of \$45 per Wesco share. Instead, the present value of Wesco’s shareholders’ advantage must logically be much lower than \$45 per Wesco share.

Business and human quality in place at Wesco continues to be not nearly as good, all factors considered, as that in place at Berkshire Hathaway. Wesco is not an equally-good-but-smaller version of Berkshire Hathaway, better because its small size makes growth easier. Instead, each dollar of book value at Wesco continues plainly to provide much less intrinsic value than a similar dollar of book value at Berkshire Hathaway. Moreover, the quality disparity in book value’s intrinsic merits has, in recent years, continued to widen in favor of Berkshire Hathaway.

All that said, we make no attempt to appraise relative attractiveness for investment of Wesco versus Berkshire Hathaway stock at present stock-market quotations.

Last year we reported that Wesco had held more than \$1 billion of cash equivalents and fixed-maturity investments since early in 2003. In the latter part of 2007 Wesco invested \$802 million, net, in marketable equity securities. Of its \$3.1 billion of assets at December 31, 2007, \$565 million is invested in cash equivalents and fixed-maturity investments. Unless significant additional amounts can be attractively reinvested in acquisitions, equity securities or other long-term instruments of the type that helped cause the long-term growth of Wesco’s shareholders’ equity, future returns on shareholders’ equity will probably be less than those of the past. Due to the current size of Wesco and its parent, Berkshire Hathaway, Wesco’s opportunities for growing shareholders’ equity are unlikely to be as attractive as in the past.

The Board of Directors recently increased Wesco’s regular dividend from 37½ cents per share to 38½ cents per share, payable March 6, 2008, to shareholders of record as of the close of business on February 7, 2008.

This annual report contains Form 10-K, a report filed with the Securities and Exchange Commission, and includes detailed information about Wesco and its subsidiaries as well as audited financial statements bearing extensive footnotes. As usual, your careful attention is sought with respect to these items.

Shareholders can access much Wesco information, including printed annual reports, earnings releases, SEC filings, and the websites of Wesco’s subsidiaries and parent, Berkshire Hathaway, from Wesco’s website: www.wescofinancial.com.

PART I

ITEM 1. Business

GENERAL

Wesco Financial Corporation (“Wesco”) was incorporated in Delaware on March 19, 1959. Wesco engages in three principal businesses through its direct or indirect wholly owned subsidiaries:

- the insurance business, through Wesco-Financial Insurance Company (“Wes-FIC”), which was incorporated in 1985 and engages in the property and casualty insurance business, and The Kansas Bankers Surety Company (“KBS”), which was incorporated in 1909, purchased by Wes-FIC in 1996 and provides specialized insurance coverages for banks;
- the furniture rental business, through CORT Business Services Corporation (“CORT”), which traces its national presence to the combination of five regional furniture rental companies in 1972 and was purchased by Wesco in 2000; and
- the steel service center business, through Precision Steel Warehouse, Inc. (“Precision Steel”), which was begun in 1940 and acquired by Wesco in 1979.

Wesco’s operations also include, through another wholly owned subsidiary, MS Property Company (“MS Property”), management of owned commercial real estate in downtown Pasadena, California. MS Property began its operations in late 1993, upon transfer to it of real properties previously owned by Wesco and by a former savings and loan subsidiary of Wesco.

Since 1973, Wesco has been 80.1%-owned by Blue Chip Stamps (“Blue Chip”), a wholly owned subsidiary of Berkshire Hathaway Inc. (“Berkshire”). Thus, Wesco and its subsidiaries are controlled by Blue Chip and Berkshire. All of these companies may also be deemed to be controlled by Warren E. Buffett, who is Berkshire’s Chairman and Chief Executive Officer and economic owner of 28.1% of its stock. Wesco’s Chairman, President and Chief Executive Officer, Charles T. Munger, is also Vice Chairman of Berkshire, and consults with Mr. Buffett with respect to Wesco’s investment decisions, major capital allocations, and the selection of the chief executives to head each of its operating businesses, subject to ultimate approval of Wesco’s Board of Directors.

Wesco’s activities fall into three business segments — insurance, furniture rental and industrial. The insurance segment consists of the operations of Wes-FIC and KBS. The furniture rental segment consists of the operations of CORT. The industrial segment comprises Precision Steel’s steel service center and industrial supply operations. Wesco is also engaged in several activities not identified with the three business segments, including investment activity unrelated to the insurance segment, MS Property’s real estate activities, and parent company activities.

INSURANCE SEGMENT

Wes-FIC was incorporated in 1985 to engage in the property and casualty insurance and reinsurance business. Its insurance operations are managed by National Indemnity Company (“NICO”), which is headquartered in Omaha, Nebraska. To simplify discussion, the term “Berkshire Insurance Group” refers to NICO, General Reinsurance Corporation, and certain other wholly owned insurance subsidiaries of Berkshire, although Berkshire also includes in its insurance group the insurance subsidiaries that are 80.1%-owned through Berkshire’s ownership of Wesco.

Wes-FIC’s high statutory net worth (about \$2.5 billion at December 31, 2007) has enabled Berkshire to offer Wes-FIC the opportunity to participate, from time to time, in contracts in which Wes-FIC effectively has reinsured certain property and casualty risks of unaffiliated property and casualty insurers. These arrangements have included “excess-of-loss” contracts such as “super-catastrophe reinsurance” contracts which subject the reinsurer to especially large amounts of losses from mega-catastrophes such as hurricanes or earthquakes. Super-catastrophe policies, which indemnify the ceding companies for all or part of covered losses in excess of large, specified retentions, have been subject to aggregate limits. Wes-FIC has also been

party to “quota-share” reinsurance, under which it shares in premiums and losses proportionately with the ceding company.

Wesco’s board of directors has authorized automatic acceptance of retrocessions of super-catastrophe reinsurance offered by the Berkshire Insurance Group provided the following guidelines and limitations are complied with: (1) in order not to delay the acceptance process, the retrocession is to be accepted without delay in writing in Nebraska by agents of Wes-FIC who are salaried employees of the Berkshire Insurance Group; (2) any ceding commission received by the Berkshire Insurance Group cannot exceed 3% of premiums, which is believed to be less than the Berkshire Insurance Group could get in the marketplace; (3) Wes-FIC is to assume 20% or less of the total risk; (4) the Berkshire Insurance Group must retain at least 80% of the identical risk; and (5) the aggregate premiums from this type of business in any twelve-month period cannot exceed 10% of Wes-FIC’s net worth. Occasionally, the Berkshire Insurance Group will also have an upper-level reinsurance interest with interests different from Wes-FIC’s, particularly in the event of one or more large losses. Although Wes-FIC has no active super-catastrophe reinsurance contracts in force, Wes-FIC may have opportunities to participate in such business from time to time in the future.

Following are some of the more significant reinsurance arrangements in which Wes-FIC has participated in recent years:

- A multi-year, quota-share arrangement, entered into in 2000 through NICO, as intermediary without profit, for participation in a pool of certain property and casualty risks written by a large, unaffiliated insurer. For 2003 and through the contract’s commutation (termination) in the latter part of 2004, Wes-FIC participated to the extent of 6% in the pool. The terms of this arrangement were identical to those accepted by a member of the Berkshire Insurance Group, except as to the amount of the participation. As a result of the commutation of the contract, Wes-FIC is no longer liable for any claims or losses, or for adjustments to losses previously recorded, under the contract.
- Participation, since 2001, in several risk pools managed by a subsidiary of General Reinsurance Corporation, a Berkshire Insurance Group member, covering principally hull, liability and workers’ compensation exposures, relating to the aviation industry. In the more recent years, Wes-FIC’s participation has been as follows: for 2005, to the extent of 10% in the hull and liability pools and 5% of the workers’ compensation pool; for 2006, 12.5% of the hull and liability pools and 5% of the workers’ compensation pool; and for 2007, 16.67% in the hull and liability pools and 5% of the workers’ compensation pool. Another General Reinsurance Corporation subsidiary provides a portion of the upper-level reinsurance protection to these aviation risk pools, and therefore to Wes-FIC, on terms that could cause some conflict of interest under certain conditions, such as in settling a large loss. Wes-FIC’s exposure to detrimental effects, however, is also mitigated because a senior manager of NICO who represents the membership interests of Wes-FIC and unrelated pool members representing an additional 75% of the hull and liability pools and 90% of the workers’ compensation pool who have the same exposures to this potential conflict of interest, has access to information regarding significant losses and thus is able to address conflict issues that might arise.

Effective January 1, 2008, Wes-FIC entered into a retrocession agreement with National Indemnity Company (“NICO”), a wholly owned indirect subsidiary of Berkshire Hathaway Inc., to assume 10% of NICO’s quota share reinsurance of Swiss Reinsurance Company and its property-casualty affiliates (“Swiss Re”). Under this retrocession agreement, Wes-FIC will assume 2% part of NICO’s 20% quota share reinsurance of all Swiss Re property-casualty risks incepting over the next five years on the same terms as NICO’s agreement with Swiss Re. If recent years’ volumes were to continue over the next five years, the annual written premium assumed under this retrocession agreement would be in the \$300 million range, however actual premiums assumed over the five year period could vary significantly depending on market conditions and opportunities.

Wes-FIC is also licensed to write “direct,” or “primary” insurance business (as distinguished from reinsurance) in Nebraska, Utah and Iowa, and may write such insurance in the non-admitted excess and surplus lines market in several other states, but the volume written to date has been minimal.

In 1996, Wes-FIC purchased 100% of KBS. KBS, which writes primary insurance, provides specialized insurance coverage to more than 20% of the banks in the United States, mostly small and medium-sized banks in the Midwest. It is licensed to write business in 38 states. Its product line for financial institutions includes policies for crime insurance, check kiting fraud indemnification, Internet banking catastrophe theft insurance, directors and officers liability, bank employment practices, and bank insurance agents professional errors and omissions indemnity, as well as deposit guaranty bonds which insure deposits in excess of federal deposit insurance limits. KBS purchases reinsurance for indemnification against large losses. For several years, through 2005, 50% of a layer of loss exposure was ceded to an unaffiliated reinsurer and the other 50% to the Berkshire Insurance Group, on identical terms. A second layer was reinsured 70% with the same non-affiliate and 30% was retained by KBS. Since 2006, when the unaffiliated reinsurer declined to renew its contract with KBS, the Berkshire Insurance Group has reinsured the entire first layer of exposure itself. Another layer is 35%-retained by KBS and the other 65% is reinsured by the Berkshire Insurance Group, at market prices. In 2007, premiums of \$3.5 million were ceded to the Berkshire Insurance Group, no losses were allocated to it, and \$125,000 of loss reserves, which had been allocated to it in 2005, were reversed. In recent years, KBS has retained a greater proportion of the risks it has underwritten. By retaining a larger amount of risk than in the past, Wesco seeks satisfactory operating results over the long term in return for greater short-term volatility.

KBS markets its products in some states through exclusive, commissioned agents, and directly to insureds in other states. Inasmuch as the number of small Midwestern banks is declining as the banking industry consolidates, KBS relies for growth on an extraordinary level of service provided by its employees and agents, and on products such as deposit guaranty bonds, which were introduced in 1993 and currently account for almost half of premiums written.

A significant marketing advantage enjoyed by the Berkshire Insurance Group, including Wesco's insurance segment, is the maintenance of exceptional capital strength. The combined statutory surplus of Wesco's insurance businesses totaled approximately \$2.5 billion at December 31, 2007. This capital strength creates opportunities for Wes-FIC to participate in reinsurance and insurance contracts not necessarily available to many of its competitors.

Management of Wesco believes that an insurer in the reinsurance business must maintain a large net worth in relation to annual premiums in order to remain solvent when called upon to pay claims when a loss occurs. In this respect, Wes-FIC and KBS are competitively well positioned, inasmuch as their net premiums written for calendar 2007 amounted to only 2% of their combined statutory surplus, compared to an industry average of 90% based on figures reported for 2006 by A.M. Best Company, a nationally recognized statistical rating organization for the insurance industry. Standard & Poor's Corporation, in recognition of Wes-FIC's strong competitive position as a member of the Berkshire Insurance Group and its unusual capital strength, has assigned its highest rating, AAA, to Wes-FIC's claims-paying ability. This rating recognizes the commitment of Wes-FIC's management to a disciplined approach to underwriting, conservative reserving, and Wes-FIC's extremely strong capital base.

Insurance companies are subject to regulation by the departments of insurance of the various states in which they write policies as well as the states in which they are domiciled and, in the case of KBS, because of its business of insuring banks, by the Department of the Treasury. Regulations relate to, among other things, capital requirements, shareholder and policyholder dividend restrictions, reporting requirements, annual audits by independent accountants, periodic regulatory examinations and limitations on the risk exposures that can be retained, as well as the size and types of investments that can be made.

Because it is operated by NICO, Wes-FIC has no employees of its own. KBS has 18 employees.

FURNITURE RENTAL SEGMENT

CORT is the nation's largest provider of rental furniture, accessories and related services in the "rent-to-rent" (as opposed to "rent-to-own") segment of the furniture industry. CORT rents high-quality furniture to corporate and individual customers who desire flexibility in meeting their temporary office, residential or trade show furnishing needs, and who typically do not seek to own such furniture. In addition,

CORT sells previously rented furniture through company-owned clearance centers, thereby enabling it to regularly renew its inventory and update styles. CORT's network of facilities (in 32 states and the District of Columbia) comprises 86 showrooms, 75 clearance centers and 74 warehouses, as well as eight websites, including www.cort.com.

CORT's rent-to-rent business is differentiated from rent-to-own businesses primarily by the terms of the rental arrangements and the type of customer served. Rent-to-rent customers generally desire high-quality furniture to meet temporary needs, have established credit, and pay on a monthly basis. Typically, these customers do not seek to acquire the property on a permanent basis. In a typical rent-to-rent transaction, the customer agrees to rent furniture for a minimum of three months, subject to extension by the customer on a month-to-month basis. By contrast, rent-to-own arrangements are generally made by customers lacking established credit whose objective is the eventual ownership of the property. These transactions are typically entered into on a month-to-month basis and may require weekly rental payments.

CORT's customer base includes primarily Fortune 500 companies, small businesses, professionals, and owners and operators of apartment communities. CORT's management believes its size, national presence, brand awareness, consistently high level of customer service, product quality, breadth of selection, depth and experience of management, and efficient clearance centers have been key contributors to the company's success. CORT offers a wide variety of office and home furnishings, including commercial panel systems, televisions, housewares and accessories. CORT emphasizes its ability to furnish an apartment, home or entire suite of offices with high-quality furniture, housewares and accessories in two business days. CORT's objective is to build upon these core competencies and competitive advantages to increase revenues and market share. Key to CORT's growth strategies are:

- expanding its commercial customer base;
- enhancing its ability to capture an increasing number of Internet customers through its on-line catalog and other web services;
- making selective acquisitions; and
- continuing to develop various products and services.

In order to capitalize on the significant profit potential available from longer average rental periods and the higher average monthly rent typically available for office products, CORT's strategy is to place greater emphasis on growth in rentals of office furniture while maintaining its premier position in residential furniture rental. In order to promote longer office lease terms, CORT offers lower rates on leases when lease terms exceeds six months. A significant portion of CORT's residential furniture rentals are derived from corporate relocations and temporary assignments, as new and transferred employees of CORT's corporate customers enter into leases for residential furniture. Thus, CORT offers its corporate rental customers a way to reduce the costs of corporate relocation and travel while developing residential business with new and transferred employees. CORT also provides short-term rentals for trade shows and conventions. Its www.corttradeshow.com website assists in providing information to and gathering leads from prospects.

The furniture rental business is dependent on economic cycles, and the recent softening of the housing sector could contribute to a weakening of the furniture rental business. Because CORT has made several selective acquisitions since it was purchased by Wesco, it is believed that CORT is now well positioned to benefit from domestic job growth and any corresponding economic expansion.

CORT provides a nation-wide apartment locator service through its websites (www.cort.com, www.relocationcentral.com and www.apartmentsearch.com) customer call centers and walk-in locations. The apartment locator service, which was begun in 2001 as CORT's Relocation Central Corporation subsidiary and marketed to individuals, has not operated profitably since inception. In order to trim operating costs, its operations were reorganized and, by yearend 2004, absorbed into CORT's. CORT's apartment locator service, which was originally intended mainly to lead to increased furniture rentals, now relies more on Internet traffic and less on walk-in locations. In consideration of its national presence and expertise in filling a need of the business community, late in 2006 CORT began marketing its relocation service, designed

specifically for renters, to Fortune 2000 companies as a comprehensive, seamless solution to their employee-relocation needs. In addition to providing rental furniture, CORT provides assistance with all aspects of employee rental-related relocations, services which include guided city tours, arranging for movers, locating temporary or long-term housing, assisting with settling in and other ancillary services. Through its network of foreign contacts, CORT also provides such services internationally. Although the relocation business is competitive, it is believed that CORT is well positioned to expand these services due not only to its national presence and liquidity, but also because the business reputation of Berkshire Hathaway gives it entrée to the offices of many prospective customers, and thus a competitive advantage.

In January 2008, CORT expanded its operations to the United Kingdom through the purchase of Roomservice Group, a small regional provider of furniture rental and relocation services.

The rent-to-rent segment of the furniture rental industry is highly competitive. There are several large regional competitors, as well as a number of smaller regional and local rent-to-rent competitors. In addition, numerous retailers offer residential and office furniture under rent-to-own arrangements. It is believed that the principal competitive factors in the furniture rental industry are product value, furniture condition, the extent of furniture selection, terms of the rental agreement, speed of delivery, exchange privileges, options to purchase, deposit requirements and customer service.

The majority of CORT's furniture sales revenue is from its clearance center sales. The remaining furniture sales revenue is derived principally from lease conversions and sales of new furniture. The sale of previously leased furniture allows CORT to control inventory quantities and to maintain inventory quality at showroom level. On average, furniture is typically sold through the clearance centers three years after its initial purchase. With respect to sales of furniture through its clearance centers, CORT competes with numerous new and used furniture retailers, some of which are larger than CORT. Wesco management believes that price and value are CORT's principal competitive advantages in this activity.

CORT has approximately 2,450 full-time employees, including 62 union members. Management considers labor relations to be good.

INDUSTRIAL SEGMENT

Precision Steel and one of its subsidiaries operate steel service centers in the Chicago and Charlotte metropolitan areas. The service centers buy stainless steel, low carbon sheet and strip steel, coated metals, spring steel, brass, phosphor bronze, aluminum and other metals, cut these metals to order, and sell them to a wide variety of customers.

The service center business is highly competitive. Precision Steel's annual sales volume of approximately 20 thousand tons of flat rolled products compares with the domestic steel service industry's annual volume for all shapes of products (flat rolled, bar, wire, structural, plate, tubular steel, etc.) of approximately 60 million tons. Precision Steel competes not only with other service centers but also with mills that supply metal to service centers, original equipment manufacturers and end-users. Sales competition exists in the areas of price, quality, availability and speed of delivery. Because it is willing to sell in relatively small quantities, Precision Steel has been able to compete in geographic areas distant from its service center facilities. Competitive pressure has been intensified by economic cycles and a shift to production abroad and an increasing tendency of domestic manufacturers to use less costly materials in making parts.

Precision Brand Products, Inc. ("Precision Brand"), a wholly owned subsidiary of Precision Steel that is also located in the Chicago area, manufactures shim stock and other toolroom specialty items, and distributes a line of hose clamps and threaded rod. These products are sold under the Precision Brand and DuPage names nationwide, generally through industrial distributors. This business is highly competitive, and Precision Brand's sales represent a very small share of the market.

Steel service raw materials are obtained principally from major domestic steel mills, and their availability had generally been good until approximately four years ago, when the market drifted into near chaos caused by shortages. Consolidation and downsizing at the mill level has resulted in extended lead times and has given the producing mills unprecedented authority in the marketplace regarding pricing and the

establishment of minimum order requirements and other restrictions. Precision Steel's service centers continue to maintain extensive inventories in order to meet customer demand for prompt deliveries; typically, processed metals are delivered to the customer within one or two weeks. Precision Brand normally maintains inventories adequate to allow for off-the-shelf service to customers within 24 hours.

The industrial segment businesses are subject to economic cycles and other factors, but are not dependent on a few large customers. The backlog of steel service orders increased to \$4.9 million at December 31, 2007 from \$4.1 million at December 31, 2006.

There are 197 full-time employees engaged in the industrial segment businesses, 40% of whom are members of unions. Management considers labor relations to be good.

ACTIVITIES NOT IDENTIFIED WITH A BUSINESS SEGMENT

Certain of Wesco's activities are not identified with any business segment. These include investment activity unrelated to the insurance segment, management of owned commercial real property, a portion of which it is redeveloping, and parent company activities.

Six full-time employees are engaged in the activities of Wesco and MS Property.

AVAILABLE INFORMATION

Wesco's Forms 10-K, 10-Q and 8-K, and amendments thereto, may be accessed soon after they are electronically filed with the Securities and Exchange Commission ("SEC"), through Wesco's website, www.wescofinancial.com, or the SEC's website, www.sec.gov.

Item 1A. Risk Factors

In addition to the factors affecting specific business operations identified in connection with the description of these operations and their financial results elsewhere in this report, we invite your attention to the considerations and risk factors described below. The risk factors could cause Wesco's actual results to differ materially from the forward-looking and other statements contained in this report and in the other periodic reports and other filings Wesco makes with the SEC, as well as in news releases, annual reports and other communications that Wesco makes from time to time.

An investment in Wesco is not an investment in Berkshire Hathaway.

From time to time there is an erroneous report by an analyst or reporter that an investor wishing to purchase Berkshire Hathaway common stock can simply purchase shares of Wesco stock at a lower price. Berkshire Hathaway is the parent of Wesco. Wesco's operations differ significantly from those of Berkshire Hathaway, and its shares may trade at a significantly different price relative to its intrinsic value than do those of Berkshire Hathaway. In addition to the risk factors affecting Wesco's operations, Berkshire Hathaway has risk factors of its own. Investors wishing to have investment exposure to Berkshire Hathaway cannot accomplish this by purchasing Wesco shares. They should carefully read Berkshire Hathaway's published financial statements and filings with the SEC.

Wesco is dependent for its investment and all other capital allocation decisions on a few key people.

Investment decisions and all other capital allocation decisions are made for Wesco's businesses by Charles T. Munger, Chairman of the Board of Directors, President and CEO of Wesco, and Vice Chairman of the Board of Directors of Berkshire Hathaway, age 84, in consultation with Warren E. Buffett, Chairman of the Board of Directors and CEO of Berkshire Hathaway, age 77. If for any reason the services of those key personnel, particularly Mr. Buffett, were to become unavailable to Wesco, there could be a materially adverse effect on Wesco. However, Berkshire's Board of Directors has agreed on a replacement for Mr. Buffett should a replacement be needed currently. Its Board continually monitors this matter and could alter its current view in the future.

Unless Wesco can reinvest a large amount currently invested in cash equivalents at attractive returns, future returns on shareholders' equity will probably be less than those of the past.

Wesco's consolidated balance sheet reflects total assets of \$3.1 billion as of yearend 2007. Of that amount, more than \$550 million has been invested in cash equivalents and fixed-maturity investments since early in 2003. Although Wesco's consolidated investments in cash-equivalent and fixed-maturity investments have declined significantly from the \$1.3 billion owned one year ago, due principally to Wesco's investment of \$802 million, net, in marketable equity securities during the latter part of 2007, unless significant additional amounts can be attractively reinvested in acquisitions, equity securities or other long-term instruments of the type that have been principally responsible for the long-term growth of Wesco's shareholders' equity, future returns on shareholders' equity will probably be less than those of the past. Due to the current size of Wesco and its parent, Berkshire Hathaway, Wesco's opportunities for growing shareholders' equity are unlikely to be as attractive as in the past.

Wesco's Wes-FIC subsidiary is dependent upon the Berkshire Insurance Group for its management and personnel, and for opportunities to participate with the Group in reinsurance contracts representing essentially the entirety of its reinsurance business, as well as a significant portion of its insurance business to date.

Since the incorporation of Wes-FIC in 1985, Wesco's insurance and reinsurance business, other than that conducted by its Kansas Bankers Surety subsidiary, has been limited principally to participation with members of the Berkshire Insurance Group in contracts for the reinsurance of risks of unaffiliated property and casualty insurance companies. Wes-FIC's operations are managed by National Indemnity Company, a member of the Berkshire Insurance Group; it has no employees of its own. In the event the Berkshire Insurance Group were to cease operating Wes-FIC's business or to significantly curtail Wes-FIC's participation with it in reinsurance contracts, Wes-FIC would be required to look elsewhere for personnel who would conduct and manage its operations, and/or seek to continue its insurance business in a different manner, possibly by acquisition. Inasmuch as Wesco and its subsidiaries, including Wes-FIC, are also subsidiaries of Berkshire Hathaway through Berkshire Hathaway's 80.1%-ownership of Wesco, Wesco does not foresee a time when Berkshire Hathaway would not continue operating its insurance business.

Wesco's tolerance for risk in its insurance businesses may result in a high degree of volatility in periodic reported earnings.

Wes-FIC participates with members of the Berkshire Insurance Group in certain reinsurance contracts in which significant risk is periodically assumed. The Berkshire Insurance Group has indicated that it continues to be willing to assume more risk than any other insurer has knowingly taken on. Although Wes-FIC's reinsurance currently in force does not subject it to super-catastrophe risks, it has procedures in place for the immediate acceptance of participations in catastrophic excess of loss reinsurance, which could subject it to large amounts of losses from mega-catastrophes such as hurricanes or earthquakes, if offered to it by the Berkshire Insurance Group, so long as the Berkshire Insurance Group participates in such reinsurance activities to a greater degree. The tolerance for significant risks may in certain future periods result in significant losses. This policy may result in a high degree of volatility in Wesco's periodic reported earnings.

As described above in Item 1, Business, Wes-FIC recently entered into a substantial quota-share arrangement whereby Wes-FIC is reinsuring 2 per cent of essentially all of the property and casualty insurance business of a large insurer not affiliated with the Berkshire Insurance Group. This arrangement will significantly increase Wes-FIC's premium volume, and thus, the potential for increased volatility and losses. In addition, as with all reinsurance arrangements, Wes-FIC does not control the underwriting of the primary insurer and relies on the primary insurer's reputation and judgment in deciding what underlying risks to insure.

The degree of estimation error inherent in the process of estimating property and casualty insurance loss reserves may result in a high degree of volatility in periodic reported earnings.

In the insurance business, premiums are charged today for promises to pay covered losses in the future. The principal cost associated with premium revenue is claims. However, it will literally take decades before all losses that have occurred as of the balance sheet date will be reported and settled. Although Wesco believes that loss reserve balances are adequate to cover losses, Wesco will not truly know whether the premiums charged for the coverages provided are sufficient until well after the balance sheet date. Wesco's objective is to generate underwriting profits over the long term. Estimating insurance claim costs is inherently imprecise. Wesco's reserve estimates are subject to revision, so adjustments to reserve estimates can have a material effect on periodic reported earnings.

Wesco's insurance subsidiaries' investments are unusually concentrated.

Compared to other insurers, Wesco's insurance subsidiaries may keep an unusually high percentage of their assets in common stocks and diversify their portfolios far less than is conventional. A significant decline in the stock market or in the price of major investees could produce a large decrease in Wesco's shareholders' equity, and could precipitate recognition of such losses in the statement of earnings. Decreases in values of equity investments could have a materially adverse effect on Wesco's book value per share, and could affect the price at which Wesco shares are traded.

Each of Wesco's operating businesses faces intense competitive pressures.

Each of Wesco's operating businesses faces intense competitive pressures within its respective market. While Wesco's businesses are managed with the objective of achieving sustainable growth over the long term through developing and strengthening competitive advantages, many factors, including market changes and technology, could erode or impede those competitive advantages.

The property and casualty insurance industry is highly competitive. Many insurers price their business more to provide immediate cash flow than profitability. Competition occurs not only with respect to price, but also to service, the ability to adapt to meet needs of customers as changes occur, reputation, and often, the need to satisfy customers' expectations that insurers have sufficient capital strength to ensure that they will be viable when called upon to pay large losses in the future. Because of the disciplined underwriting standards of the Berkshire Insurance Group, Wes-FIC does not enter into insurance or reinsurance activities that do not provide the expectation of acceptable underwriting profitability. Thus, the volume of written premiums will continue to vary significantly from period to period.

CORT competes not only with regional and local furniture rental businesses, but also with furniture businesses offering "lease purchase" or "rent-to-own" programs, as well as with national, regional and local furniture retailers. Competitive factors include price, furniture style and condition, lease terms, speed of delivery and overall customer service.

Precision Steel's annual sales volume is a small fraction of the domestic steel service industry's. Precision Steel competes not only with other service centers, but also with mills that supply metal to the service centers. Sales competition exists in the areas of price, quality, availability, speed of delivery, and customer service. Competitive pressure has been intensified by imports, a shift to production abroad and an increasing tendency of domestic manufacturers to use less costly materials in making products. Precision Steel's subsidiary's toolroom specialty business also faces strong competition, mainly based on price.

In addition to the foregoing risk factors inherent in Wesco's operations, Wesco's shareholders face a market liquidity risk because the daily trading volume of Wesco's shares on the American Stock Exchange is relatively low.

In addition to the risks facing Wesco in its business operations, investors wishing to purchase or sell shares of its capital stock face market price risks because the daily AMEX trading volume of Wesco's shares is

relatively low. An order for the purchase or sale of a large number of Wesco shares could significantly affect the price at which the order is executed.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

CORT leases 16,212 square feet of office space in a multistory office building in Fairfax, Virginia, which it uses as its headquarters under a lease which will expire in 2012.

CORT carries out its rental, sales and warehouse operations in metropolitan areas in 32 states and the District of Columbia through 164 facilities, of which 17 were owned and the balance leased as of December 31, 2007. The leased facilities' lease terms expire at dates ranging from 2008 to 2018. CORT has generally been able to extend expiration dates of its leases or obtain suitable alternative facilities on satisfactory terms. As leases expire, CORT has been eliminating redundant locations and decreasing the size of its showrooms, which as of yearend 2007 ranged in size from 1,200 to 10,388 square feet of floor space. Where locations are desirable, its management has been attempting to combine rental, clearance and warehouse operations rather than retain separate showrooms, because business and residential customers have been increasingly using the Internet. CORT regularly reviews the presentation and appearance of its furniture showrooms and clearance centers and periodically improves or refurbishes them to enhance their attractiveness to customers.

MS Property owns a business block in Pasadena, California situated between the city hall and a large shopping mall. The block's improvements include a nine-story office building that was constructed in 1964 and has approximately 125,000 square feet of net rentable area, and a multistory garage with space for 420 vehicles. Of the 125,000 square feet of space in the office building, approximately 5,000 square feet are used by MS Property or leased to Blue Chip or Wesco at market rental rates. The remaining space is almost fully leased to outside parties, including Citibank (the ground floor tenant), law firms and others, under agreements expiring at dates extending to 2017. Adjacent to the building and garage is a parcel on which MS Property is nearing completion of a multi-story, 28-unit, luxury condominium building. MS Property is seeking city approval of its plans, at a later date, to build another multi-story luxury condominium building on a vacant parcel of land it owns in the next block.

MS Property also owns several buildings that are leased to various small businesses in a small shopping center in Southern California.

Wes-FIC's place of business is the Omaha, Nebraska headquarters office of NICO.

KBS leases 5,100 square feet of office space in a multistory office building in Topeka, Kansas under a lease that expires June 30, 2012.

Precision Steel and its subsidiaries own three buildings housing their plant and office facilities, with usable area approximately as follows: 138,000 square feet in Franklin Park, Illinois; 63,000 square feet in Charlotte, North Carolina; and 59,000 square feet in Downers Grove, Illinois.

Item 3. Legal Proceedings

Wesco and its subsidiaries are not involved in any legal proceedings that are expected to result in detrimental financial impact material to its shareholders' equity. However, see Note 9 to the accompanying consolidated financial statements for an explanation of an environmental matter involving Precision Steel and one of its subsidiaries that could materially impact consolidated net income in a particular fiscal period.

Item 4. Submission of Matters to a Vote of Security Holders

None.

PART II

Item 5. Market for Registrant’s Common Equity, Related Shareholder Matters and Issuer Repurchases of Equity Securities

Throughout 2006, Wesco’s capital stock was listed on the American Stock Exchange and on the NYSE Arca Exchange (previously, the Pacific Exchange). Effective as of yearend 2006, in order to reduce duplicative administrative burdens and costs, Wesco withdrew its shares from listing on the NYSE Arca Exchange.

The following table sets forth quarterly ranges of composite prices for American Stock Exchange trading of Wesco shares for 2007 and 2006, based on data reported by the American Stock Exchange, as well as cash dividends paid by Wesco on each outstanding share:

Quarter Ended	2007			2006		
	Sales Price		Dividends Paid	Sales Price		Dividends Paid
	High	Low		High	Low	
March 31	\$501	\$433	\$0.375	\$411	\$377	\$0.365
June 30	466	385	0.375	408	361	0.365
September 30	409	375	0.375	437	367	0.365
December 31	432	388	0.375	505	429	0.365
			<u>\$1.500</u>			<u>\$1.460</u>

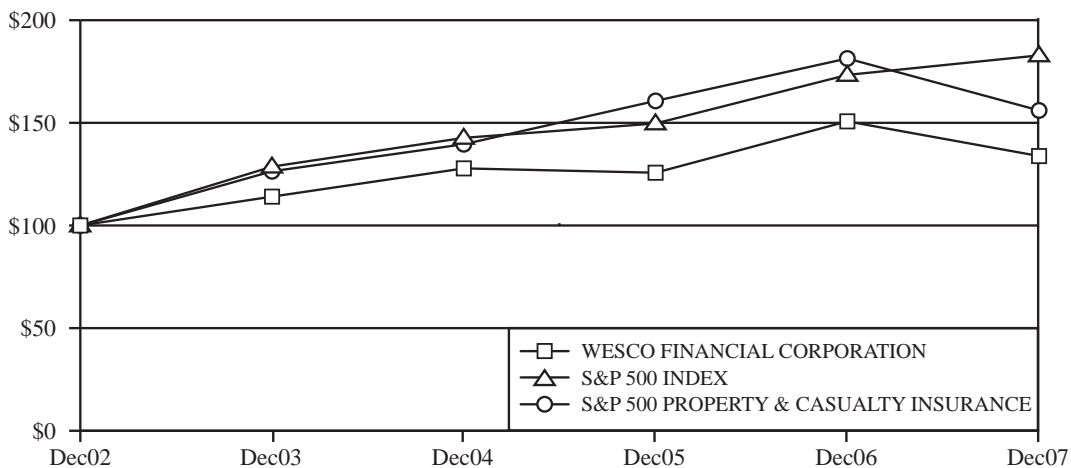

There were approximately 410 shareholders of record of Wesco’s capital stock as of the close of business on February 7, 2008. It is estimated that approximately 4,000 additional Wesco shareholders held shares of Wesco’s capital stock in street name at that date.

Wesco did not purchase any of its own equity securities during 2007.

Wesco Stock Performance Graph

The following graph compares the value at each subsequent yearend of \$100 invested in Wesco capital stock on December 31, 2002 with identical investments in the Standard and Poor’s (“S&P”) 500 Stock Index and the S&P Property-Casualty Insurance Index, assuming reinvestment of dividends.

Comparison of Five Year Cumulative Return*

* It would be difficult to develop a peer group of companies similar to Wesco. The Company owns subsidiaries engaged in a number of diverse business activities of which the most important is the property and casualty insurance business and, accordingly, management has used the Standard and Poor’s Property-Casualty Insurance Index for comparative purposes.

Item 6. Selected Financial Data

Set forth below and on the following page are selected consolidated financial data for Wesco and its subsidiaries. For additional financial information, attention is directed to Wesco's audited 2007 consolidated financial statements appearing in Item 8 of this report. (Amounts are in thousands except for amounts per share.)

The reinsurance activities of Wesco's insurance segment are managed by Berkshire Hathaway's National Indemnity Company ("NICO") subsidiary and represent participations in contracts in which NICO and other members of the Berkshire Insurance Group also participate. Financial information associated with these participations is identified in Wesco's consolidated financial statements, as well as in Item 6, Selected Financial Data, as affiliated business.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

In reviewing this item, attention is directed to Item 6, Selected Financial Data, and Item 1, Business.

OVERVIEW

The principal goal of Wesco's management is to maximize gain in Wesco's intrinsic business value per share over the long term. Accounting consequences do not influence business decisions, nor do fluctuations in annual net income. To accomplish desired growth, a high priority is placed on the purchases of companies having excellent economic characteristics, run by outstanding managers. Management strives also to invest

in common stocks of outstanding publicly traded companies at prices deemed reasonable. In the event that such investments are not available, as has often been the case in recent years, capital is preserved through investments principally in high-quality cash equivalents and securities of the U.S. Government and its agencies.

Wesco's operating businesses are managed on a decentralized basis. There are essentially no centralized or integrated business functions (such as sales, marketing, purchasing, legal or human resources) and there is minimal involvement by Wesco's management in the day-to-day business activities of the operating businesses. Wesco's Chairman, President and Chief Executive Officer, Charles T. Munger, is also Vice Chairman of Berkshire Hathaway, and consults with Warren E. Buffett, Chairman and Chief Executive Officer of Berkshire Hathaway, with respect to Wesco's investment decisions, major capital allocations, and the selection of the chief executives to head each of Wesco's operating units, subject to ultimate approval of Wesco's Board of Directors.

The operations of Wesco's Wesco-Financial Insurance Company ("Wes-FIC") subsidiary are managed by Berkshire Hathaway's National Indemnity Company ("NICO") subsidiary. Wes-FIC participates principally in reinsurance contracts in which NICO and other Berkshire Hathaway insurance subsidiaries participate in the reinsurance of property and casualty risks of unaffiliated insurance companies. Terms of Wes-FIC's participation are essentially identical to those by which the other Berkshire Hathaway insurance subsidiaries participate, except as to the percentages of participation (see Item 1, Business, for further information). Financial information relative to these participations appearing in Item 6, Selected Financial Data, and in Wesco's consolidated financial statements, is identified as affiliated business.

Financial Condition

Wesco continues to have a strong consolidated balance sheet at December 31, 2007, with relatively little debt. Liquidity, which has traditionally been high, has been higher than usual for the past several years due principally to sales, maturities and redemptions of fixed-maturity and other investments, and reinvestment of the proceeds, mainly in cash equivalents pending redeployment for the long term. In the latter half of 2007, \$802 million, net, was invested in marketable equity securities. Principally as a result, the Company's consolidated balance sheet reflects marketable equity securities with fair value of \$1.919 billion as of yearend 2007, versus \$1.041 billion as of yearend 2006.

Wesco's equity investments are in strong, well-known companies. The practice of concentrating in a few issues, rather than diversifying, follows the investment philosophy of the chairmen-CEOs of Wesco and its parent, Berkshire Hathaway, who consult with respect to Wesco's investments and major capital allocations. Wesco has no investments in subprime loans.

Results of Operations

Wesco's consolidated net income has fluctuated from year to year, often significantly, as a result of the realization of gains on investments. Realized gains amounted to \$24.2 million (\$15.8 million, after taxes) for 2007 and \$333.2 million (\$216.6 million, after income taxes) for 2005. No gains or losses were realized in 2006. The investment gains realized in 2005 resulted principally from the exchange of common shares of the Gillette Company ("Gillette") for common shares of The Procter & Gamble Company ("PG") in connection with PG's acquisition of Gillette in the fourth quarter of 2005. The amount, if any, of realized gain or loss in any year has no predictive value and variations in amount from year to year have no practical analytical value, particularly in view of the existence of substantial unrealized price appreciation in Wesco's consolidated investment portfolio at each balance sheet date.

Wesco's consolidated 2007 after-tax income, excluding realized investment gains, increased by \$1.4 million for the year, due mainly to increased investment and underwriting income earned by the insurance businesses, significantly offset by increased operating expenses of the furniture rental business, as the Company's CORT Business Services Corporation subsidiary expands and redirects the marketing of its rental relocation services from targeting individuals to targeting corporate clients.

FINANCIAL CONDITION

Wesco's shareholders' equity at December 31, 2007 was \$2.53 billion (\$356.03 per share), up \$134.5 million from the \$2.40 billion (\$337.14 per share) at December 31, 2006. Shareholders' equity included \$381.0 million at December 31, 2007, and \$345.0 million at December 31, 2006, representing appreciation in market value of investments, which is credited directly to shareholders' equity, net of taxes, without being reflected in earnings. Because unrealized appreciation is recorded using market quotations, gains or losses ultimately realized upon sale of investments could differ substantially from recorded unrealized appreciation. The unrealized gain component amounted to 15.0% of shareholders' equity at December 31, 2007, versus 14.4% one year earlier.

Wesco's consolidated borrowings totaled \$37.2 million at December 31, 2007 versus \$38.2 million at December 31, 2006. Except as to \$0.2 million at each yearend, these amounts related to a \$100 million revolving credit facility used in CORT's furniture rental business. In addition to this recorded debt, Wesco and its subsidiaries had \$138.3 million of operating lease and other contractual obligations at December 31, 2007, versus \$147.4 million one year earlier. (See the section on off-balance sheet arrangements and contractual obligations appearing below in this Item 7, as well as Note 7 to the accompanying consolidated financial statements, for additional information on debt.)

Wesco's liability for unpaid losses and loss adjustment expenses at December 31, 2007 totaled \$93.8 million versus \$78.3 million at December 31, 2006. Wesco-FIC enjoys Standard & Poor's Corporation's highest rating, AAA, with respect to its claims-paying ability.

RESULTS OF OPERATIONS

Wesco's reportable business segments are organized in a manner that reflects how Wesco's top management views those business activities. Wesco's management views insurance businesses as possessing two distinct operations — underwriting and investing, and believes that "underwriting gain or loss" is an important measure of their financial performance. Underwriting gain or loss represents the simple arithmetic difference between the following line items appearing on the consolidated statement of income: (1) insurance premiums earned, less (2) insurance losses and loss adjustment expenses, and insurance underwriting expenses. Management's goal is to generate underwriting gains over the long term. Underwriting results are evaluated without allocation of investment income.

The consolidated data in the second table in Item 6 are set forth essentially in the income statement format customary to generally accepted accounting principles ("GAAP"). Revenues, including realized net investment gains, are followed by costs and expenses, and a provision for income taxes, to arrive at net income. The following summary sets forth the after-tax contribution to GAAP net income of each business segment — insurance, furniture rental and industrial — as well as activities not considered related to such segments. Realized net investment gains are excluded from segment activities, consistent with the way Wesco's management views the business operations. (Amounts are in thousands, *all after income tax effect*.)

In the following sections the data set forth in the foregoing summary on an *after-tax* basis are broken down and discussed.

Insurance Segment

Wesco engages in both primary insurance and reinsurance of property and casualty risks through Wesco-Financial Insurance Company (“Wes-FIC”) and The Kansas Bankers Surety Company (“KBS”). Their operations are conducted or supervised by wholly owned subsidiaries of Berkshire Hathaway, Wesco’s ultimate parent company. In reinsurance activities, defined portions of similar or dissimilar risks that other insurers or reinsurers have subjected themselves to in their own insuring activities are assumed. In primary insurance activities, defined portions of the risks of loss from persons or organizations that are directly subject to the risks are assumed. For purposes of the following discussion, the results have been disaggregated between reinsurance and primary insurance activities. Following is a summary of the insurance segment’s underwriting activities. (Amounts are in thousands.)

	<u>Year Ended December 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Insurance premiums written —			
Reinsurance	\$35,346	\$35,710	\$29,054

Underwriting gain	<u>\$ 7,040</u>	<u>\$ 5,164</u>	<u>\$11,798</u>

The nature of Wes-FIC’s participation in the aviation-related reinsurance contracts requires that estimates be made not only as to losses and expenses incurred, but also as to premiums written, due to a time lag in reporting by the ceding pools. In addition, periodic underwriting results can be affected significantly by changes in estimates for unpaid losses and loss adjustment expenses, including amounts established for occurrences in prior years. See the Critical Accounting Policies section of this discussion for information concerning the loss reserve estimation process.

Reinsurance premiums written for 2007 decreased by \$0.4 million (1.0%), and earned reinsurance premiums increased by \$1.7 million (5.0%), from the corresponding 2006 figures, despite the 33.3% increase in the level at which Wes-FIC participated in the hull and liability pools in 2007. As competition has intensified in the aviation market, the pools have experienced greater pricing pressures and have continued to exercise underwriting discipline by not writing policies where pricing was deemed inadequate with respect to the risks assumed. Written premiums for 2006 increased by 22.9%, and earned reinsurance premiums increased by 17.6%, from those of 2005. These increases were attributed principally to the 25%-higher level of participation in the hull and liability pools in 2006, as well as an increase in the volume of business written by the workers’ compensation pool. Intensifying competitive pressures, which negatively affected written premiums for 2006, more significantly affected written premiums for 2007.

Reinsurance activities have fluctuated from year to year as participations in reinsurance contracts have become available both through insurance subsidiaries of Berkshire and otherwise. See Item 1, Business, for information about Wes-FIC’s participation in a an additional quota-share reinsurance contract, expected to

significantly increase its premium volume over a five-year period beginning in 2008. The level of business written by Wes-FIC in future periods will also vary, perhaps materially, based upon market conditions and management's assessment of the adequacy of premium rates.

Written primary insurance premiums decreased by \$0.3 million in both 2007 and 2006, representing decreases of 1.6% for 2007 and 6.6% for 2006. KBS has experienced intensified price competition during the past approximately two years, and has reacted through the exercise of underwriting discipline.

Management believes that "underwriting gain or loss" is an important measure of financial performance of insurance companies. When stated as a percentage, the sum of insurance losses, loss adjustment expenses and underwriting expenses, divided by premiums, gives the combined ratio. A combined ratio of less than 100% connotes an underwriting profit and a combined ratio of greater than 100% connotes an underwriting loss. The ratio is figured on a pre-tax basis. Underwriting results of Wesco's insurance segment have generally been favorable, but have fluctuated from year to year for various reasons, including competitiveness of pricing in terms of premiums charged for risks assumed, and volatility of losses incurred.

For 2007, 2006 and 2005, reinsurance generated underwriting gains of \$2.2 million, \$2.5 million and \$6.9 million, representing combined ratios of 93.9%, 94.0% and 75.9%, all of which management considers to have been favorable. The figures for the two most recent years reflect the detrimental effects of increasingly competitive pressures which have resulted in the ongoing softening of prices in terms of premiums charged throughout those years. The 2006 figure also reflects less favorable claims experience in the latter half of the year, with respect to the hull and liability contracts, where Wes-FIC's participation increased by 25 percent for that year. Had it not been for net favorable reserve development of \$3.2 million in 2007, essentially all of which related to the aviation-related contracts, reinsurance activities for 2007 would have generated an underwriting loss of \$1.3 million (\$0.8 million, after taxes). The underwriting results for 2006 and 2005 also include net favorable (unfavorable) reserve development of (\$0.4 million) for 2006, comprised of unfavorable development of \$1.7 million attributable to the aviation-related contracts, partially offset by \$1.3 million of favorable development for a contract whose coverage period ended in 1989, and \$0.7 million for 2005, attributable to the aviation-related contracts. The 2005 figure also reflects estimated losses of \$0.7 million, before taxes, related to Hurricane Katrina, which struck the Gulf Coast of the United States in the third quarter.

Combined ratios from primary insurance were 55.1%, 73.8% and 58.8% for 2007, 2006 and 2005, which management considers to have been favorable. In 2007, pre-tax underwriting results improved by \$3.3 million (60.4%) and included net favorable reserve development of \$3.6 million associated with estimates of losses recorded in several previous years, most notably, the reversal of a \$1.9 million estimated loss recorded in 2005, following a recent court decision. In 2006, pre-tax underwriting results from primary insurance declined by \$2.3 million (29.9%) from those of 2005. Underwriting results from primary insurance included net unfavorable loss development of \$0.2 million and \$0.6 million, before taxes, for 2006 and 2005, amounts not considered significant.

It should be noted that the profitability of a reinsurance or insurance arrangement is better assessed after all losses and expenses have been realized, perhaps many years after the coverage period, rather than for any given reporting period. No trends have been identified which directly relate to losses, other than the effects from the current trend of increasing competition, causing declining premium rates. Losses incurred by Wesco's insurance segment, by their very nature, occur unexpectedly and fluctuate from period to period in both frequency and magnitude. Wesco's insurers cede minimal amounts of their direct business, and as a result underwriting results may be volatile.

The income tax provision associated with the insurance segment's underwriting activities for 2005 benefited by \$2.3 million relating to the resolution of an issue raised in an examination of prior year income tax returns by the Internal Revenue Service.

Since September 11, 2001, the insurance industry has been particularly concerned about its exposure to claims resulting from acts of terrorism. In spite of partial relief provided to the insurance industry by the Terrorism Risk Insurance Act, enacted in 2002 and amended by the Terrorism Risk Extension Act of 2005, and

the Terrorism Risk Insurance Program Reauthorization Act of 2007, Wes-FIC is exposed to insurance losses from terrorist events. Wes-FIC's (and thus Wesco's) exposure to such losses from an insurance standpoint cannot be predicted. Management, however, does not believe it likely that, on a worst-case basis, Wesco's shareholders' equity would be severely impacted by future terrorism-related insurance losses under reinsurance or insurance contracts currently in effect. Losses from terrorism could, however, significantly impact Wesco's periodic reported earnings.

Other industry concerns in recent years have included exposures to losses relating to environmental contamination and asbestos. Management currently believes such exposures to be minimal.

Following is a summary of investment income produced by Wesco's insurance segment (in thousands of dollars).

	Year Ended December 31,		
	2007	2006	2005
Investment income, before taxes	\$89,716	\$83,441	\$55,889
Income taxes	<u>24,509</u>	<u>24,913</u>	<u>16,821</u>
Investment income, after taxes	<u>\$65,207</u>	<u>\$58,528</u>	<u>\$39,068</u>

Investment income of the insurance segment comprises dividends and interest earned principally from the investment of shareholder capital (including reinvested earnings) as well as float (principally, premiums received before payment of related claims and expenses). The \$6.3 million (7.5%) increase in pre-tax investment income for 2007 reflected a \$11.7 million increase in dividend income, attributable principally to the investment of \$801.7 million, net, in equity securities in the latter part of 2007, partially offset by a decline in interest income resulting mainly from the use of interest-bearing cash equivalents and fixed-maturity investments for the purchase of the equity securities. The increase of \$27.6 million (49.3%) in investment income for 2006 was due principally to higher interest rates earned on short-term investments. Dividend income improved slightly.

Wesco continues to seek to invest cash balances in the purchase of businesses and in long-term equity holdings.

Wesco's insurance subsidiaries, as a matter of practice, maintain liquidity in amounts which exceed by wide margins expected near-term requirements for payment of claims and expenses. As a result, it would be unlikely that any unanticipated payment of claims or expenses would require the liquidation of investments at a loss. Wesco does not attempt to match long-term investment maturities to estimated durations of claim liabilities.

Reference is made to the table of contractual obligations appearing on page 30.

Furniture Rental Segment

Following is a summary of the results of operations of CORT Business Services Corporation ("CORT"), Wesco's furniture rental segment. (Amounts are in thousands.)

	<u>Year Ended December 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Revenues:			
Furniture rentals	\$327,671	\$324,300	\$303,485
Furniture sales	61,704	69,551	72,394
Service fees	6,795	6,454	8,021
	<u>396,170</u>	<u>400,305</u>	<u>383,900</u>
Cost of rentals, sales and fees	91,407	101,605	102,032
Selling, general and administrative expenses	268,469	252,657	250,542
Interest expense	2,408	2,711	1,575
	<u>362,284</u>	<u>356,973</u>	<u>354,149</u>
Income before income taxes	33,886	43,332	29,751
Income taxes	13,570	16,448	9,075
Segment net income	<u>\$ 20,316</u>	<u>\$ 26,884</u>	<u>\$ 20,676</u>

Furniture rental revenues for 2007 increased \$3.4 million (1.0%) from those of 2006, after increasing \$20.8 million (6.9%) for 2006 from those of 2005. Excluding rental revenues from trade shows and locations not in operation throughout each year, rental revenues for 2007 decreased 0.6% from those of 2006, following an increase of approximately 4.9% in the preceding year. The number of furniture leases outstanding at yearend 2007 was 5.7% lower than at yearend 2006, following a decline of 5.1% in the preceding year. The decrease in the number of outstanding leases continues a trend that developed late in 2006, believed to be due principally to non-renewals of leases generated in the aftermath of hurricanes Katrina and Rita, increased energy prices, and customer uncertainty as to future economic conditions. Despite the continued decline in the number of furniture leases outstanding, furniture rental revenues have grown due mainly to increased demand for events and tradeshow and improved pricing.

Furniture sales revenues for 2007 decreased \$7.8 million (11.3%) from those of 2006, following a decrease in 2006 of \$2.8 million (3.9%) from those of 2005. The decreases are believed to be attributed principally to the continued softening of the housing market and higher energy prices that have contributed to an industry-wide decline in retail furniture sales.

Service fees for 2007 increased \$0.3 million (5.3%) after a decreasing \$1.6 million (19.5%) in 2006 from those reported for 2005. Traditionally, the furniture segment has concentrated the marketing efforts of its relocation services towards individual residential customers. Late in 2006, CORT began a new initiative to expand the variety of its relocation services, and it redirected the thrust of this activity toward providing these services to corporate relocation departments for their relocating employees in need of temporary or longer-term housing. Although initial traction has been slow, management is hopeful that the expansion of facilities and personnel devoted to rental relocation services, as well as the change in focus of its relocation activities, will result in profitable long-term revenue growth.

Cost of rentals, sales and fees amounted to 23.1% of revenues for 2007, versus 25.4% for 2006, and 26.6% for 2005. The decrease in costs as percentages of revenues have been due principally to improvement in revenue mix, with a larger percentage of each successive year's revenue attributable to furniture rentals, which has a higher margin than furniture sales.

Selling, general, administrative and interest expenses ("operating expenses") for the segment were \$270.8 million for 2007, up 6.0% from the \$255.4 million incurred for 2006, following an increase of 1.3% from the \$252.1 million incurred for 2005. The increase in operating expenses in 2007 was due principally to

an increase in advertising and personnel-related costs associated with the rental relocation service as CORT continues to redirect and expand its marketing efforts to target corporate clients.

Income before income taxes for the furniture rental segment amounted to \$33.9 million in 2007, versus \$43.3 million in 2006, and \$29.8 million in 2005. The 21.7% decrease in pre-tax operating results for 2007 was principally attributable to the significant increase in operating expenses, offset somewhat by increased gross profits resulting from changes in revenue mix. The improvement in 2006 resulted significantly from increasing revenues, change in revenue mix, and the continued focus on controlling operating expenses.

Industrial Segment

Following is a summary of the results of operations of the industrial segment, consisting of the businesses of Precision Steel and its subsidiaries. (Amounts are in thousands.)

	<u>Year Ended December 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Revenues, principally sales and services	<u>\$61,361</u>	<u>\$63,053</u>	<u>\$61,334</u>
Income before income taxes	\$ 1,518	\$ 1,918	\$ 2,056
Income taxes	<u>603</u>	<u>707</u>	<u>858</u>
Segment net income	<u>\$ 915</u>	<u>\$ 1,211</u>	<u>\$ 1,198</u>

The operations of the industrial segment have suffered a variety of ongoing difficulties for a number of years, including periodic economic downturns, a shift of production by many customers from domestic to overseas facilities, intensifying competitive pressures among service centers for remaining domestic business, unprecedented ability of the major steel producers in recent years to raise prices and establish minimum order quantities, following consolidation in the industry, and intensified competitive pressures for product from suppliers and for sales.

In addition to a decline in the number of orders placed in recent years, there has also been a trend towards smaller-sized orders. The severity of the impact of the foregoing factors on Wesco's industrial segment is demonstrated by the significant decline in sales volume, in terms of pounds sold, from an average of 68 million pounds annually, over the three-year period of 1998 through 2000, to an average of 44 million pounds annually, over the most recent three-year period. Average industrial segment revenues have not declined as significantly, principally because many customers have generally accepted higher prices as Wesco's industrial segment has struggled to maintain its margins.

In 2005 competition for sales intensified and prices softened, but remained substantially higher than in the early 2000's. The year 2006 started out well. Volume, in terms of pounds sold for the first quarter, increased by 9.9% over the comparable figure for the first quarter for 2005; however, as the year progressed, increasing competitive pressures and a slowdown in domestic manufacturing activity caused volume to decline and, by yearend, volume for the year was 0.4% lower than in 2005. Segment revenues for the year, however, increased by \$1.7 million (2.8%). Approximately half of the increase in revenues was attributable to a large sale of toolroom supplies to a single customer. Excluding that transaction, segment revenues for 2006 increased by \$0.8 million (1.3%) over those of 2005.

As 2007 progressed, demand slowed, and customers became more resistant to higher prices, primarily specialty stainless steel products, which in one year period increased on average by approximately 40%, based principally on mill surcharges for chromium and nickel, as global demand for these basic commodities remained high. Revenues for the year decreased by \$1.7 million (2.7%) from those of 2006. Excluding from 2006 revenues the extraordinarily large sale of toolroom supplies to the single customer, revenues for 2007 decreased by \$0.8 million (1.3%) as compared with those of 2006. Sales volume, in terms of pounds sold, decreased by approximately 14%. As a result of the decline in volume somewhat offset by higher steel prices, income from operations declined by \$0.4 million for 2007.

As explained in Note 9 to the consolidated financial statements, Precision Steel and a subsidiary are involved in environmental litigation. Management anticipates that additional provisions and legal fees with respect to environmental remediation may be required in the future. However, as of December 31, 2007, it was not possible to reasonably estimate the amount, if any, of additional costs or a range of costs, that may be required in connection with the matter. Although management does not anticipate that the ultimate impact of such provisions and costs, net of future insurance recoveries, if any, will be material in relation to Wesco's shareholders' equity, it believes that the effect on industrial segment and consolidated net income in any given period could be material.

Unrelated to Business Segment Operations

Wesco's consolidated earnings included net realized investment gains of \$24.2 million (\$15.8 million, after taxes) for 2007, and \$332.5 million (\$216.1 million, after taxes) for 2005. Of the latter amount, \$216.1 million, after taxes, resulted from Wesco's non-cash exchange of common shares of The Gillette Company ("Gillette") for common shares of The Procter & Gamble Company ("PG") in connection with the purchase of Gillette by PG in the fourth quarter. The \$332.5 million excess of fair value of the shares exchanged over Wesco's original cost basis was recorded by Wesco as a realized investment gain on October 1, the date of the transaction, as required under generally accepted accounting principles. Although the gain had a material impact on Wesco's reported earnings for the fourth quarter of 2005, there was no effect on shareholders' equity. Wesco carried its investment in Gillette at market value with unrealized gains reflected, net of potential income tax effect, in the net unrealized appreciation component of its shareholders' equity, as of September 30, 2005. Federal income taxes are not currently payable as a result of the exchange. No investment gains or losses were realized in 2006.

Management's principal goal is to maximize gain in Wesco's intrinsic business value per share over the long term. Accounting consequences do not influence business decisions. There is no particular strategy as to the timing of sales of investments. Investments may be sold for a variety of reasons, including (1) the belief that prospects for future appreciation of a particular investment are less attractive than the prospects for reinvestment of the after-tax proceeds from its sale, or (2) the desire to generate funds for an acquisition or repayment of debt. Investment gains may also derive from non-cash exchanges of securities for other investment securities as a result of merger activity involving the investees.

Other nonsegment items include mainly (1) rental income from owned commercial real estate and (2) dividend and interest income from marketable securities and cash equivalents owned outside the insurance subsidiaries, reduced by real estate and general and administrative expenses. In the fourth quarter of 2005, Wesco and its MS Property Company subsidiary reduced their liabilities for deferred income taxes by an aggregate of \$4.9 million. That amount is reflected as a reduction of income tax expense of activities unrelated to business segments.

* * * *

Consolidated revenues, expenses and net income reported for any period are not necessarily indicative of future results in that they are subject to significant variations in amount and timing of (1) participations in reinsurance contracts with members of the Berkshire Insurance Group, such as the quota-share arrangement described in Item 1, Business, which is expected to significantly increase the business of the insurance segment for a five-year period beginning in 2008, (2) investment gains and losses, or (3) unusual nonoperating items. In addition, consolidated revenues, expenses and net income are subject to external conditions, such as terrorist activity, and changes in the economy.

Wesco is not presently suffering from inflation, but its business operations have potential exposure, particularly in the insurance and industrial segments. Large unanticipated changes in the rate of inflation could adversely impact the insurance business, because premium rates are established well in advance of expenditures. Precision Steel's businesses are competitive and operate on tight gross profit margins, making their earnings susceptible to inflationary and deflationary cost changes; the impact, though not material in relation to Wesco's consolidated net income, may be significant to that of the industrial segment, due particularly to the segment's use of LIFO inventory accounting.

OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL OBLIGATIONS

Neither Wesco nor any of its subsidiaries has off-balance sheet arrangements other than the unrecorded contractual obligations discussed below. Nor do they have any insurance obligations for which estimated provisions have not been made in the accompanying consolidated financial statements or notes thereto.

Wesco and its subsidiaries have contractual obligations associated with ongoing business activities, which will result in cash payments in future periods. Certain obligations, such as notes payable, accrued interest, and unpaid insurance losses and loss adjustment expenses, are reflected in the accompanying consolidated financial statements. In addition, Wesco and its subsidiaries have entered into long-term contracts to acquire goods or services in the future, which are not currently reflected in the consolidated financial statements and will be reflected in future periods as the goods are delivered or services provided. A summary of contractual obligations as of December 31, 2007 follows. (Amounts are in thousands.)

	<u>Total</u>	<u>Payments Due</u>			
		<u>2008</u>	<u>2009-2010</u>	<u>2011-2012</u>	<u>Thereafter</u>
Notes payable, including interest	\$ 37,540	\$ 37,340	\$ —	\$ —	\$ 200
Operating lease obligations	103,852	25,925	40,709	23,006	14,212
Payment of insurance losses and loss adjustment expenses*	93,845	22,341	29,447	18,899	23,158
Purchase obligations, other than for capital expenditures	12,030	11,108	922	—	—
Purchase obligations for capital expenditures**	17,310	17,310	—	—	—
Other, principally deferred compensation . .	5,069	61	52	52	4,904
Totals	<u>\$269,646</u>	<u>\$114,085</u>	<u>\$71,130</u>	<u>\$41,957</u>	<u>\$42,474</u>

*Amounts and timing of payments are significantly dependent on estimates. See Critical Accounting Policies and Practices below.

**Principally, construction costs of MS Property's luxury condominium development.

CRITICAL ACCOUNTING POLICIES AND PRACTICES

Wesco's consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States ("GAAP"). The significant accounting policies and practices followed by Wesco are set forth in Note 1 to the accompanying consolidated financial statements. Following are the accounting policies and practices considered by Wesco's management to be critical to the determination of consolidated financial position and results of operations.

Use of Estimates in Preparation of Financial Statements

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported revenues and expenses during the period reported upon. In particular, estimates of unpaid losses and loss adjustment expenses for property and casualty insurance are subject to considerable estimation error due to the inherent uncertainty in projecting ultimate claim amounts that will be reported and settled over a period of many years. The estimates and assumptions are based on management's evaluation of the relevant facts and circumstances using information available at the time such estimates and assumptions are made. The amounts of such assets, liabilities, revenues and expenses included in the consolidated financial statements may differ significantly from those that might result from use of estimates and assumptions based on facts and circumstances not yet available. Although Wesco's management does not believe such changes in estimates would have a materially adverse effect on shareholders' equity, they could produce a material effect on results of operations in a reporting period.

Investments

The appropriate classifications of investments in securities with fixed maturities and marketable equity securities are established at the time of purchase and reevaluated as of each balance sheet date. There are three permissible classifications: held-to-maturity, trading and available-for-sale. In recent years, all equity and fixed-maturity investments have been classified as available-for-sale and carried at fair value, with unrealized gains and losses, net of applicable deferred income taxes, reported as a separate component of shareholders' equity.

Rental Furniture

Rental furniture consists principally of residential and office furniture which is available for rental or, if no longer up to rental standards or excessive in quantity, for sale. Rental furniture is carried at cost, less accumulated depreciation calculated primarily on a declining-balance basis over 3 to 5 years using estimated salvage values of 25 to 40 percent of original cost.

Revenue Recognition

Insurance premiums are stated net of amounts ceded to reinsurers and are recognized as earned revenues in proportion to the insurance protection provided, which in most cases is pro rata over the term of each contract. Premiums are estimated with respect to certain reinsurance contracts written during the period where reports from ceding companies for the period are not contractually due until after the balance sheet date. Unearned insurance premiums are deferred in the liability section of the consolidated balance sheet. Certain costs of acquiring insurance premiums — commissions, premium taxes, and other — are deferred and charged to income as the premiums are earned.

Furniture rentals are recognized as revenue proportionately over the rental contract period; rentals received in advance are deferred in the liability section of the consolidated balance sheet. Related costs comprise the main element of cost of products and services sold on the consolidated income statement and include depreciation expense, repairs and maintenance and inventory losses.

Losses and Loss Adjustment Expenses

Liabilities for unpaid insurance losses and loss adjustment expenses represent estimates of the ultimate amounts payable under property and casualty reinsurance and insurance contracts related to losses occurring on or before the balance sheet date. Liabilities for insurance losses are comprised of estimates for reported claims ("case reserves"); and reserve development on reported claims and estimates for claims that have not yet been reported (some of which may not be reported for many years), which together are also referred to as "incurred-but-not-reported" reserves ("IBNR" reserves). The liability for unpaid losses includes significant estimates for these claims and include estimates reported by ceding insurers. Loss reserve estimates reflect past loss experience, adjusted as appropriate when losses are reasonably expected to deviate from experience.

Provisions for losses and loss adjustment expenses are reported in the consolidated statement of income after deducting estimates of amounts that will be recoverable under reinsurance contracts. Reinsurance contracts do not relieve the ceding companies of their obligations to indemnify policyholders with respect to the underlying insurance contracts. Ceded reinsurance losses recoverable ("ceded reserves") are reflected in the accompanying Consolidated Balance Sheets as a component of accounts receivable.

Depending on the type of loss being estimated, the timing and amount of loss payments are subject to a great degree of variability and are contingent, among other factors, upon the timing of the claim reporting by cedants and insureds, and the determination and payment of the ultimate loss amounts through the loss adjustment process. Judgments and assumptions are necessary in projecting the ultimate amounts payable in the future with respect to loss events that have occurred.

The time period between the claim occurrence date and payment date of the loss is referred to as the "claim tail." Property claims usually have fairly short claim tails, and, absent litigation, are reported and

settled within a few months or years after occurrence. Casualty losses usually have very long claim tails. Casualty claims can be more susceptible to litigation and can be more significantly affected by changing contract interpretations and the legal environment, which contributes to extended claim tails. Claim tails for reinsurers may be further extended due to delayed reporting by ceding insurers or reinsurers due to contractual provisions or reporting practices. Actual ultimate loss settlement amounts are likely to differ from amounts recorded at the balance sheet date. Changes in estimates, referred to as “loss development,” are recorded as a component of losses incurred in the period of change. Wes-FIC and KBS do not use consultants to assist in reserving activities.

Following is a summary of Wesco’s consolidated liabilities for insurance losses and loss adjustment expenses and related reinsurance recoverables (in thousands of dollars).

	<u>December, 31</u> <u>2007</u>	<u>December 31,</u> <u>2006</u>
Case reserves	\$58,160	\$49,834
IBNR reserves	<u>35,685</u>	<u>28,476</u>
Gross liability before ceded reinsurance	93,845	78,310
Ceded reserves	<u>(23,502)*</u>	<u>(11,628)*</u>
Net reserves	<u><u>\$70,343</u></u>	<u><u>\$66,682</u></u>

*Represents principally, Wes-FIC’s proportionate share of reinsurance purchased by the aviation pools.

The techniques and processes employed in estimating loss reserves are differentiated between reinsurance and primary insurance.

Reinsurance— Historically, Wes-FIC’s property and casualty loss reserves derive from individual risk, multi-line and catastrophe reinsurance policies. However, Wes-FIC’s reinsurance activity in recent years has consisted almost exclusively of participations in aviation-related pools that are underwritten and managed by a wholly owned indirect subsidiary of Wesco’s parent company, Berkshire Hathaway Inc.

Non-aviation reinsurance reserve amounts were less than 10% of Wesco’s gross consolidated reserves as of December 31, 2007 and December 31, 2006 (mostly in IBNR reserves) and primarily related to a quota-share contract that has been in runoff for more than 10 years, under which Wes-FIC continues to make loss payments. Such amounts reflected loss estimates reported by the ceding companies and additional IBNR reserves estimates by Wes-FIC management, which were mainly a function of reported losses from ceding companies, anticipated loss ratios for the contract period, and management’s judgment as to the loss reserving adequacy of the ceding companies.

Gross aviation loss reserves were approximately \$67 million at December 31, 2007 and \$50 million at December 31, 2006 (\$44 million and \$39 million, net of reinsurance, at those dates), of which gross IBNR reserves were approximately \$23 million and \$18 million, respectively. Losses from aviation coverages generally have reasonably short tails with respect to the property components. The claim tail for the liability coverage can be somewhat longer, especially when litigation results. The case reserving process for aviation risks is believed to involve less uncertainty than for many other types of insurance, because loss events tend to become known and reported relatively soon after the events occur. The material judgments underlying the loss reserving by the aviation pools’ manager assume that future loss patterns (incurred and paid) will be similar to those of the past. The aviation pools’ manager establishes case and IBNR reserves and manages the claims settlement process, including payment of the related claims. Wes-FIC is allocated its share of these amounts, monthly. The pools’ manager has considerable experience with aviation insurance and claims. Wes-FIC management reviews reported claim amounts for reasonableness and has historically accepted the amounts without further adjustment, except for adjustments made for minor reporting delays.

Wes-FIC management is represented at regular meetings and presentations held by the pools' manager, and Wesco believes that Wes-FIC is able to closely monitor and assess the pools' manager's judgments concerning reserves.

Considerable judgment is required to evaluate claims and estimate claims liabilities in connection with reinsurance contracts. As further data become available, the liabilities are reevaluated and adjusted as appropriate. Additionally, reported claims are in various stages of the settlement process. Each claim is settled individually based upon its merits, and some take years to settle, especially if legal action is involved. Actual ultimate claims amounts are likely to differ from amounts recorded at the balance sheet date.

Primary insurance — Loss reserves from Wesco's primary insurance activities derive from individual risk policies written by KBS, which primarily provides specialty coverages for financial institutions. Reserve amounts are comprised of case estimates and estimates of IBNR reserves, which approximated \$7 million at both yearends of 2007 and 2006. Because of the relatively low number (or frequency) of losses and potential for higher severity (or amount per claim), KBS management is familiar with and closely monitors each claim. Losses generally are expected to have a relatively short reporting and claim tail due to the nature of the claims. KBS provides deposit guaranty bonds, which insure deposits in excess of federal deposit insurance limits, crime insurance, check kiting fraud indemnification, Internet banking catastrophe theft insurance, directors and officers liability, bank employment practices, as well as bank insurance agents professional errors and omissions indemnity. As a result, reserves are primarily developed from case estimates, reducing the need for extended actuarial studies and broad estimates of IBNR of the nature typically performed by large primary insurers whose business volume requires such procedures for the development of their loss data. A range of reserve amounts as a result of changes in underlying assumptions is not prepared.

Goodwill

Goodwill of acquired businesses represents the excess of the cost of acquired entities (principally CORT) over the fair values assigned to assets acquired and liabilities assumed. The Company accounts for goodwill in accordance with Statement of Financial Accounting Standards ("SFAS") No. 142, "Goodwill and Other Intangible Assets," which requires the Company to test goodwill for impairment annually or whenever events or changes in circumstances indicate that the carrying values may not be recoverable. Annual impairment tests are performed in the fourth quarter of each year using a variety of methods that require that certain assumptions and estimates be made regarding economic factors and future profitability. Impairments, if any, are charged to earnings.

Realized investment gains and losses

Realized investment gains and losses, determined on a specific-identification basis, are included in the consolidated statement of income, as are provisions for other-than-temporary declines in market or estimated fair value, when applicable. Factors considered in judging whether an impairment is other than temporary include: the financial condition, business prospects and creditworthiness of the issuer, the length of time that fair value has been less than cost, the relative amount of the decline, and Wesco's ability and intent to hold the investment until the fair value recovers.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Wesco's consolidated balance sheet contains substantial liquidity as well as substantial amounts of investments whose estimated fair (carrying) values are subject to market risks. Its fixed-maturity investments are backed by the U.S. Government and its agencies. Values of marketable equity securities are subject to fluctuations in their stock market prices, and values of securities with fixed maturities are subject to changes in interest rate levels. Apart from investments, the consolidated balance sheet at December 31, 2007 did not contain significant assets or liabilities with values subject to these or other potential market exposures such as

changes in commodity prices or foreign exchange rates. Wesco does not utilize derivatives to manage market risks.

EQUITY PRICE RISK

Wesco's consolidated balance sheet at December 31, 2007 contained \$1.92 billion of marketable equity securities stated at market value, up from \$1.04 billion one year earlier. The increase was due principally to the purchase of \$802 million, net, of marketable equity securities in the latter part of 2007. Net unrealized appreciation increased \$55 million during 2007. The carrying values of Wesco's equity securities are exposed to market price fluctuations, which may be accentuated by the concentration existing in the equity portfolio. (At December 31, 2007, four investments comprised 87% of the carrying value of the consolidated equity securities portfolio.) The four largest holdings of the consolidated group at December 31, 2007 (\$1.68 billion, combined) were common stocks of The Procter & Gamble Company, The Coca-Cola Company, Kraft Foods Inc. and Wells Fargo & Company, of which the first three have significant global operations and thus are subject to changes in foreign currency exchange rates, and the latter has significant mortgage-lending operations and is exposed to the weakening domestic credit market caused mainly by accelerating weakness in the domestic housing market.

Strategically, Wesco strives to invest in businesses that possess excellent economics, with able and honest management, at sensible prices. Wesco's management prefers to invest a meaningful amount in each investee, resulting in concentration. Most equity investments are expected to be held for long periods of time; thus, Wesco's management is not ordinarily troubled by short-term price volatility with respect to its investments provided that the underlying business, economic and management characteristics of the investees remain favorable. Wesco strives to maintain above-average levels of shareholders' equity as well as much liquidity to provide a margin of safety against short-term equity price volatility.

The carrying values of investments subject to equity price risks are based on quoted market prices. Market prices are subject to fluctuation and, consequently, the amount realized upon the subsequent sale of an investment may significantly differ from the reported market value. Fluctuation in the market price of a security may result from perceived changes in the underlying economic characteristics of the investee, the relative prices of alternative investments, or general market conditions. Furthermore, amounts realized upon the sale of a particular security may be adversely affected if a relatively large quantity of the security is being sold.

The following table summarizes Wesco's equity price risks as of December 31, 2007 and 2006. It shows the effects of a hypothetical 30% overall increase or decrease in market prices of marketable equity securities owned by the Wesco group on total recorded market value and, after tax effect, on Wesco's shareholders' equity at each of those dates. (Amounts are in thousands.)

	<u>December 31, 2007</u>		<u>December 31, 2006</u>	
	<u>Increase</u>	<u>Decrease</u>	<u>Increase</u>	<u>Decrease</u>
Market value of marketable equity securities —				
As recorded	\$1,919,425	\$1,919,425	\$1,040,550	\$1,040,550
Hypothetical	2,495,252	1,343,597	1,352,716	728,385
Shareholders' equity —				
As recorded	2,534,859	2,534,859	2,400,338	2,400,338
Hypothetical	<u>2,909,147</u>	<u>2,160,571</u>	<u>2,603,245</u>	<u>2,197,430</u>

The 30% hypothetical changes in market values assumed in preparing the tables do not reflect what could be considered best- or worst-case scenarios. Actual results could be much worse or better due both to the nature of equity markets and the aforementioned concentration existing in Wesco's equity investment portfolio.

INTEREST RATE RISK

Wesco's consolidated balance sheet at December 31, 2007 contained \$527 million of cash and cash equivalents and \$39 million of securities with fixed maturities stated at fair value, versus \$1.26 billion of cash and cash equivalents and \$82 million of securities with fixed maturities one year earlier. Consequently, market value risks with respect to interest-rate movements or other factors as of December 31, 2007 are considered insignificant.

The fair values of Wesco's fixed-maturity investments fluctuate in response to changes in market interest rates. Increases and decreases in prevailing interest rates generally translate into decreases and increases in fair values. Fair values of Wesco's investments may also be affected by the creditworthiness of the issuer, prepayment options, relative values of alternative investments, the liquidity of the instrument and other general market conditions. Wesco, as a matter of practice, invests only in fixed-maturity securities of the highest quality. As of yearend 2007, its fixed-maturity investments consisted of securities of the U.S. Treasury and of agencies of the U.S. Government.

FORWARD-LOOKING STATEMENTS

Certain written or oral representations of management stated in this annual report or elsewhere constitute "forward-looking" statements within the meaning of the Private Securities Litigation Reform Act of 1995, as contrasted with statements of historical fact. Forward-looking statements include statements which are predictive in nature, or which depend upon or refer to future events or conditions, or which include words such as *expects*, *anticipates*, *intends*, *plans*, *believes*, *estimates*, *may*, or *could*, or which involve hypothetical events. Forward-looking statements are based on information currently available and are subject to various risks and uncertainties that could cause actual events or results to differ materially from those characterized as being likely or possible to occur. Such statements should be considered judgments only, not guarantees, and Wesco's management assumes no duty, nor has it any specific intention, to update them.

Actual events and results may differ materially from those expressed or forecasted in forward-looking statements due to a number of factors. The principal important risk factors that could cause Wesco's actual performance and future events and actions to differ materially from those expressed in or implied by such forward-looking statements include, but are not limited to those risks reported in Item 1A, Risk Factors, but also to the occurrence of one or more catastrophic events such as acts of terrorism, hurricanes, or other events that cause losses insured by Wesco's insurance subsidiaries, changes in insurance laws or regulations, changes in income tax laws or regulations, and changes in general economic and market factors that affect the prices of investment securities or the industries in which Wesco and its affiliates do business.

Item 8. Financial Statements and Supplementary Data

Following is an index to financial statements and related schedules of Wesco appearing in this report:

<u>Financial Statements</u>	<u>Page Number(s)</u>
Report of independent registered public accounting firm	39-40
Consolidated balance sheet — December 31, 2007 and 2006	41
Consolidated statement of income — years ended December 31, 2007, 2006 and 2005	42
Consolidated statement of cash flows — years ended December 31, 2007, 2006 and 2005	43
Consolidated statement of changes in shareholders' equity and comprehensive income — years ended December 31, 2007, 2006 and 2005	44
Notes to consolidated financial statements	45-56

Listed below are financial statement schedules required by the SEC to be included in this report. The data appearing therein should be read in conjunction with the consolidated financial statements and notes thereto of Wesco and report of independent registered public accounting firm referred to above. Schedules not

included with these financial statement schedules have been omitted because they are not applicable or the required information is shown in the consolidated financial statements or notes thereto.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable, as there were no such changes or disagreements.

Item 9A. Controls and Procedures

An evaluation was performed under the supervision and with the participation of the Company’s management, including Charles T. Munger, its Chief Executive Officer and Jeffrey L. Jacobson, its Chief Financial Officer, of the effectiveness of the design and operation of the Company’s disclosure controls and procedures as of December 31, 2007. Based on that evaluation, Messrs. Munger and Jacobson concluded that the Company’s disclosure controls and procedures are effective in ensuring that information required to be disclosed by the Company in reports it files or submits under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), is recorded, processed, summarized and reported as specified in the rules and forms of the Securities Exchange Commission, and are effective to ensure that information required to be disclosed by Wesco in the reports it files or submits under the Exchange Act, as amended, is accumulated and communicated to Wesco’s management, including Messrs. Munger and Jacobson, as appropriate, to allow timely decisions regarding required disclosure.

There has been no change in the Company’s internal control over financial reporting during the fiscal quarter ended December 31, 2007 that has materially affected, or is reasonably likely to materially affect, the Company’s internal control over financial reporting.

In Part I, Item 4 (“Controls and Procedures”) of each of Wesco’s Forms 10-Q filed for the quarters ended March 31, 2007, June 30, 2007 and September 30, 2007, we mistakenly referred to an evaluation of Wesco’s disclosure controls and procedures as of December 31, 2006, when separate evaluations were actually conducted as of the end of each quarter under report. Based on those three separate evaluations, Wesco’s Chief Executive Officer and Chief Financial Officer concluded that Wesco’s disclosure controls and procedures were effective as of March 31, 2007, June 30, 2007 and September 30, 2007.

MANAGEMENT’S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Wesco’s management is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Rule 13a-15(f) under the Exchange Act. The internal control system of Wesco and its subsidiaries is designed to provide reasonable assurance regarding the preparation and fair presentation of Wesco’s published consolidated financial statements. Under the supervision and with the participation of our management, including Charles T. Munger, our principal executive officer, and Jeffrey L. Jacobson, our principal financial officer, we conducted an evaluation of the effectiveness of the Company’s internal control over financial reporting as of December 31, 2007 as required by Rule 13a-15(c) under the Exchange Act. In making this assessment, we used the criteria set forth in the framework in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that evaluation, we concluded that Wesco’s internal control over financial reporting was effective as of December 31, 2007.

Wesco's independent registered public accounting firm has audited our internal control over financial reporting as of December 31, 2007. Their report begins on Page 39.

WESCO FINANCIAL CORPORATION

Pasadena, California
February 27, 2008

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information set forth in the sections "Election of Directors," "Executive Officers," "Corporate Governance" and "Code of Business Conduct and Ethics" appearing in the definitive combined notice of annual meeting and proxy statement of Wesco for its annual meeting of shareholders scheduled to be held May 7, 2008 (the "2008 Proxy Statement") is incorporated herein by reference.

Item 11. Executive Compensation

The information set forth in the sections "Compensation of Executive Officers," "Compensation Discussion and Analysis" and "Director Compensation" in the 2008 Proxy Statement is incorporated herein by reference. All such compensation is cash compensation; Wesco neither has, nor is considering having, any stock option plan or other equity compensation arrangement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters

The information set forth in the sections "Voting Securities and Principal Holders Thereof," "Security Ownership of Certain Beneficial Owners and Management" and "Section 16(A) Beneficial Ownership Reporting Compliance" in the 2008 Proxy Statement is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Certain information set forth in the sections "Election of Directors," "Voting Securities and Principal Holders Thereof," "Compensation of Executive Officers," "Director Compensation," "Corporate Governance" and "Compensation Discussion and Analysis" in the 2008 Proxy Statement is incorporated herein by reference.

Item 14. Principal Accountant Fees and Services

The information set forth in the section "Independent Registered Public Accounting Firm" in the 2008 Proxy Statement is incorporated herein by reference.

Item 15. Exhibits and Financial Statement Schedules

The following exhibits (listed by numbers corresponding to Table 1 of Item 601 of Regulation S-K) are filed as part of this Annual Report on Form 10-K or are incorporated herein by reference:

- 3a — Articles of incorporation of Wesco (filed as exhibit 3a to Wesco's Form 10-K for the year ended December 31, 1999) and Bylaws of Wesco (filed as exhibit 3.2 to Wesco's Form 8-K dated December 5, 2007 — Commission File No. 1-4720)

14 — Code of Ethics (may be accessed through Wesco's website, www.wescofinancial.com.)

21 — List of subsidiaries

31(a) — Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 (chief executive officer)

31(b) — Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 (chief financial officer)

32(a) — Certification Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (chief executive officer)

32(b) — Certification Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (chief financial officer)

Instruments defining the rights of holders of long-term debt of Wesco and its subsidiaries are not being filed since the total amount of securities authorized by all such instruments does not exceed 10% of the total assets of Wesco and its subsidiaries on a consolidated basis as of December 31, 2007. Wesco hereby agrees to furnish to the Commission upon request a copy of any such debt instrument to which it is a party.

The index to financial statements and related schedules set forth in Item 8 of this report is incorporated herein by reference.

SIGNATURES

Pursuant to the requirements of Section 13 of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Wesco Financial Corporation
Pasadena, California

We have audited the accompanying consolidated balance sheets of Wesco Financial Corporation and subsidiaries (the "Company") as of December 31, 2007 and 2006, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2007. Our audits also included the financial statement schedule listed in the Index at Item 8. We also have audited the Company's internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting, and for

its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on these financial statements and financial statement schedule and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Wesco Financial Corporation and subsidiaries as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2007, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on the criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

WESCO FINANCIAL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollar amounts in thousands except for amounts per share)

Note 1. Significant Accounting Policies and Practices

Nature of operations, basis of consolidation, and presentation

Wesco Financial Corporation ("Wesco") is, indirectly, an 80.1%-owned subsidiary of Berkshire Hathaway Inc. ("Berkshire"). Wesco is a holding company. Its consolidated financial statements include the accounts of Wesco and its subsidiaries, all wholly owned. Its principal subsidiaries are Wesco-Financial Insurance Company ("Wes-FIC"), The Kansas Bankers Surety Company ("KBS"), CORT Business Services Corporation ("CORT") and Precision Steel Warehouse, Inc. ("Precision Steel"). Further information regarding these businesses is contained in Note 11. Intercompany balances and transactions are eliminated in the preparation of the consolidated financial statements.

The operations of Wes-FIC are managed by Berkshire Hathaway's National Indemnity Company ("NICO") subsidiary. Historically, a significant part of Wes-FIC's insurance business has derived from contracts with NICO and other wholly owned insurance subsidiaries of Berkshire. To simplify discussion, the term "Berkshire Insurance Group," as used herein, refers to those companies, individually or collectively, although Berkshire also includes in its insurance group the insurance subsidiaries that are 80.1%-owned through Berkshire's ownership of Wesco. Terms of Wes-FIC's participation in the insurance contracts are essentially identical to those by which the other Berkshire Insurance Group members participate, except as to the relative percentages of their participation in the various contracts. Financial data appearing in the accompanying consolidated financial statements relative to business with the Berkshire Insurance Group is designated as affiliated business.

Accounting pronouncements not yet in effect

Wesco's management does not believe than any accounting pronouncements issued to date by the Financial Accounting Standards Board or other applicable authorities and required to be adopted after yearend 2007 are likely to have a material effect on shareholders' equity.

Use of estimates in preparation of financial statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported revenues and expenses during the period reported upon. In particular, estimates of unpaid losses and loss adjustment expenses for property and casualty insurance are subject to considerable estimation error due to the inherent uncertainty in projecting ultimate claim amounts that will be reported and settled over a period of many years. The estimates and assumptions are based on management's evaluation of the relevant facts and circumstances using information available at the time such estimates and assumptions are made. The amounts of such assets, liabilities, revenues and expenses included in the consolidated financial statements may differ significantly from those that might result from use of estimates and assumptions based on facts and circumstances not yet available. Although Wesco's management does not believe such changes in estimates would have a materially adverse effect on shareholders' equity, they could produce a material effect on results of operations in a reporting period.

Cash equivalents

Cash equivalents consist of funds invested in U.S. Treasury Bills, money market accounts, and in other investments with a maturity of three months or less when purchased.

Investments

The appropriate classifications of investments in securities with fixed maturities and marketable equity securities are established at the time of purchase and reevaluated as of each balance sheet date. There are three permissible classifications: held-to-maturity, trading, and, when neither of those classifications is applicable, available-for-sale. In recent years, all equity and fixed-maturity investments have been classified as available-for-sale and carried at fair value, with unrealized gains and losses, net of applicable deferred income taxes, reported as a separate component of shareholders' equity.

Realized investment gains and losses, determined on a specific-identification basis, are included in the consolidated statement of income, as are provisions for other-than-temporary declines in market or estimated fair value, when applicable. Factors considered in judging whether an impairment is other than temporary include: the financial condition, business prospects and creditworthiness of the issuer, the length of time that fair value has been less than cost, the relative amount of the decline, and Wesco's ability and intent to hold the investment until the fair value recovers.

Accounts receivable

Substantially all accounts receivable are due from customers located within the United States. Accounts receivable are recorded net of an allowance for doubtful accounts, based on a review of specifically identified accounts in addition to an overall collectibility analysis. Judgments are made with respect to the collectibility of accounts receivable based on historical experience and current economic trends. Actual losses could differ from those estimates.

Rental furniture

Rental furniture consists principally of residential and office furniture which is available for rental or, if no longer up to rental standards, for sale. Rental furniture is carried at cost, less accumulated depreciation calculated primarily on a declining-balance basis over 3 to 5 years using estimated salvage values of 25 to 40 percent of original cost.

Goodwill of acquired businesses

Goodwill of acquired businesses represents the excess of the cost of acquired entities over the fair values assigned to assets acquired and liabilities assumed. The Company accounts for goodwill in accordance with Statement of Financial Accounting Standards ("SFAS") No. 142, "Goodwill and Other Intangible Assets," which requires the Company to test goodwill for impairment annually or whenever events or changes in circumstances indicate that the carrying values may not be recoverable. Annual impairment tests are performed in the fourth quarter of each year using a variety of methods that require that certain assumptions and estimates be made regarding economic factors and future profitability. Impairments, if any, are charged to earnings.

Inventories

Inventories of \$8,473 and \$7,942, included in other assets on the accompanying consolidated balance sheet at December 31, 2007 and 2006, are stated at the lower of last-in, first-out ("LIFO") cost or market; under this method, the most recent costs are reflected in cost of products sold. The aggregate differences in values between LIFO cost and cost determined under the first-in, first-out ("FIFO") methods were \$10,915 and \$9,169 as of December 31, 2007 and December 31, 2006, respectively. LIFO inventory accounting adjustments decreased income before income taxes by \$1,695, \$994 and \$347 (\$1,020, \$598 and \$208, after income taxes) for 2007, 2006 and 2005.

Dollar amounts in thousands except for amounts per share

Capitalized Construction Costs

Capitalized construction costs are included in other assets on the accompanying consolidated balance sheet at December 31, 2007 and 2006. These costs are associated with the acquisition, development and construction of a real estate project managed by MS Property Company, a Wesco subsidiary.

Revenue recognition

Insurance premiums are stated net of amounts ceded to reinsurers and are recognized as earned revenues in proportion to the insurance protection provided, which in most cases is pro rata over the term of each contract. Premiums are estimated with respect to certain reinsurance contracts written during the period where reports from ceding companies for the period are not contractually due until after the balance sheet date. Unearned insurance premiums are deferred and reflected in the liability section of the consolidated balance sheet. Certain costs of acquiring insurance premiums — commissions, premium taxes, and other — are deferred and charged to income as the premiums are earned.

Furniture rentals are recognized as revenue proportionately over the rental contract period; rentals received in advance are deferred in the liability section of the consolidated balance sheet. Costs related to furniture rentals comprise the main element of cost of products and services sold on the consolidated income statement and include depreciation expense, repairs and maintenance, and inventory losses.

Revenues from product sales are recognized upon passage of title to the customer, which coincides with customer pickup, product shipment, delivery or acceptance, depending on the sales arrangement. Revenues from services performed are recognized at the completion of the elements specified in the contract, which typically coincides with their being billed.

Interest income from investments in bonds and mortgage-backed securities is earned under the constant yield method and includes accrual of interest due as well as amortization of acquisition premiums and accruable discounts. In determining the constant yield for mortgage-backed securities, anticipated counterparty prepayments are estimated and evaluated periodically. Dividends from equity securities are earned on the ex-dividend date.

Losses and loss adjustment expenses

Liabilities for unpaid insurance losses and loss adjustment expenses represent estimates of the ultimate amounts payable under property and casualty reinsurance and insurance contracts related to losses occurring on or before the balance sheet date. Liabilities for insurance losses are comprised of estimates for reported claims (“Case reserves”); and reserve development on reported claims and estimates for claims that have not yet been reported (some of which may not be reported for many years), which together are also referred to as “incurred-but-not-reported” reserves (“IBNR” reserves). The liability for unpaid losses includes significant estimates for these claims and include estimates reported by ceding insurers. Loss reserve estimates reflect past loss experience, adjusted as appropriate when losses are reasonably expected to deviate from experience.

Considerable judgment is required to evaluate claims and estimate claims liabilities in connection with reinsurance contracts. As further data become available, the liabilities are reevaluated and adjusted as appropriate. Additionally, reported claims are in various stages of the settlement process. Each claim is settled individually based upon its merits, and some take years to settle, especially if legal action is involved. Actual ultimate claims amounts are likely to differ from amounts recorded at the balance sheet date.

Depending on the type of loss being estimated, the timing and amount of loss payments are subject to a great degree of variability and are contingent, among other factors, upon the timing of the claim reporting by cedants and insureds, and the determination and payment of the ultimate loss amounts through the loss adjustment process. Judgments and assumptions are necessary in projecting the ultimate amounts payable in the future with respect to loss events that have occurred.

Dollar amounts in thousands except for amounts per share

The time period between the claim occurrence date and payment date of the loss is referred to as the “claim tail.” Property claims usually have fairly short claim tails, and, absent litigation, are reported and settled within a few months or years after occurrence. Casualty losses usually have very long claim tails. Casualty claims can be more susceptible to litigation and can be more significantly affected by changing contract interpretations and the legal environment, which contributes to extended claim tails. Claim tails for reinsurers may be further extended due to delayed reporting by ceding insurers or reinsurers due to contractual provisions or reporting practices. Actual ultimate loss settlement amounts are likely to differ from amounts recorded at the balance sheet date. Changes in estimates, referred to as “loss development,” are recorded as a component of losses incurred in the period of change.

Provisions for losses and loss adjustment expenses are reported in the consolidated statement of income after deducting estimates of amounts that will be recoverable under reinsurance contracts. Reinsurance contracts do not relieve the ceding companies of their obligations to indemnify policyholders with respect to the underlying insurance contracts. Ceded reinsurance losses recoverable (“ceded reserves”) are reflected in the accompanying consolidated balance sheet as a component of accounts receivable.

Income taxes

Wesco and its subsidiaries join in the filing of consolidated Federal income tax returns of Berkshire Hathaway Inc. The consolidated Federal tax liability is apportioned among group members pursuant to methods that result in each member of the group paying or receiving an amount that approximates the increase or decrease in consolidated taxes attributable to that member. In addition, Wesco and its subsidiaries also file income tax returns in state and local jurisdictions as applicable.

Provisions for current income tax liabilities are calculated and accrued on income and expense amounts expected to be included in the income tax returns for the current year. Deferred income taxes are calculated under the liability method. Deferred income tax assets and liabilities are based on differences between the financial statement and tax bases of assets and liabilities at the current enacted tax rates.

Changes in deferred income tax assets and liabilities that are associated with components of other comprehensive income (essentially, unrealized investment gains and losses) are charged or credited directly to other comprehensive income. Otherwise, changes in deferred income tax assets and liabilities are included as a component of income tax expense. Changes in deferred income taxes and liabilities attributable to changes in enacted tax rates are charged or credited to income tax expense in the period of enactment. Valuation allowances are established for deferred tax assets where realization is not likely.

Assets and liabilities are established for uncertain tax positions taken or positions expected to be taken in income tax returns when such positions are judged to not meet the “more-likely-than-not” threshold based on the technical merits of the positions. Estimated interest and penalties related to uncertain tax positions are included as a component of income tax expense.

Note 2. Investments

Following is a summary of investments in securities with fixed maturities:

	<u>December 31, 2007</u>		<u>December 31, 2006</u>	
	<u>Amortized Cost</u>	<u>Estimated Fair (Carrying) Value</u>	<u>Amortized Cost</u>	<u>Estimated Fair (Carrying) Value</u>
Mortgage-backed securities	\$33,564	\$34,573	\$39,173	\$39,799
Other, principally U.S. government obligations	<u>3,914</u>	<u>4,027</u>	<u>42,070</u>	<u>42,062</u>
	<u>\$37,478</u>	<u>\$38,600</u>	<u>\$81,243</u>	<u>\$81,861</u>

At yearend 2007 and 2006, the estimated fair values of securities with fixed maturities contained unrealized gains of \$1,267 and \$633. Unrealized losses at yearend 2007 and 2006 totaled \$145 and \$15.

Dollar amounts in thousands except for amounts per share

Shown below are the amortized cost and estimated fair values of securities with fixed maturities at December 31, 2007, by contractual maturity dates.

	<u>Amortized Cost</u>	<u>Estimated Fair (Carrying) Value</u>
Due in 2008	\$ 3,914	\$ 4,027
Mortgage-backed securities	<u>33,564</u>	<u>34,573</u>
	<u>\$37,478</u>	<u>\$38,600</u>

Following is a summary of investments in marketable equity securities (all common stocks):

	<u>December 31, 2007</u>		<u>December 31, 2006</u>	
	<u>Cost</u>	<u>Fair (Carrying) Value</u>	<u>Cost</u>	<u>Fair (Carrying) Value</u>
The Procter & Gamble Company	\$ 424,367	\$ 525,283	\$424,367	\$ 459,820
The Coca-Cola Company	40,761	442,208	40,761	347,670
Wells Fargo & Company	382,779	381,698	25,189	93,992
Kraft Foods Incorporated	325,816	326,300	—	—
Other	<u>161,528</u>	<u>243,936</u>	<u>20,687</u>	<u>139,068</u>
	<u>\$1,335,251</u>	<u>\$1,919,425</u>	<u>\$511,004</u>	<u>\$1,040,550</u>

Total unrealized losses of equity securities at December 31, 2007 were \$61,916, all of which related to securities in an unrealized loss position for less than twelve months as of that date. There were no unrealized losses at December 31, 2006.

Realized investment gains are summarized below.

	<u>December 31, 2007</u>	<u>December 31, 2006</u>	<u>December 31, 2005</u>
Realized investment gains	\$24,240	\$ —	\$333,255
Realized investment losses	—	—	(14)
	<u>\$24,240</u>	<u>\$ —</u>	<u>\$333,241</u>

Although the investments of Wesco and its subsidiaries are subject to market risks, derivatives are not utilized to manage risks.

Note 3. Accounts Receivable

Accounts receivable are comprised of the following:

	<u>December 31, 2007</u>	<u>December 31, 2006</u>
Trade accounts receivable	\$81,442	\$62,971
Allowance for uncollectible accounts	<u>(1,930)</u>	<u>(2,585)</u>
	<u>\$79,512</u>	<u>\$60,386</u>

Dollar amounts in thousands except for amounts per share

Note 4. Rental Furniture

Following is a breakdown of rental furniture:

	<u>December 31,</u> <u>2007</u>	<u>December 31,</u> <u>2006</u>
Cost of rental furniture	\$277,672	\$278,177
Less accumulated depreciation	<u>(99,375)</u>	<u>(95,331)</u>
	<u>\$178,297</u>	<u>\$182,846</u>

Note 5. Goodwill

At yearends 2007 and 2006, the balance of goodwill carried as an asset on Wesco's consolidated balance sheet amounted to \$266,607, of which \$239,616 related to Wesco's acquisition of CORT, with the balance pertaining to the KBS acquisition. SFAS No. 142 requires that a two-step impairment test be performed annually or whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. The first step of the test for impairment compares the book value of the Company's reporting unit to its estimated fair value. The second step of the goodwill impairment test, which is only required when the net book value of the reporting unit exceeds the fair value, compares the implied fair value of goodwill to its book value to determine if an impairment is required.

Because fair value is believed to exceed book value, step two was not required. Fair value is estimated using a variety of techniques and considerable judgment is required. Under the income approach, the Company estimates the fair value of the reporting unit based on the present value of future cash flows. This approach is dependent on a number of factors including projections of future earnings and discount rates. Although management believes the determination was based on reasonably conservative estimates, results of future operations are uncertain and potential revisions to the projections of future earnings or discount rates, caused by adverse changes to the underlying long-term economics of the business, could lead to an impairment of all or a portion of goodwill in future periods.

Note 6. Insurance Losses and Loss Adjustment Expenses Payable

The balances of unpaid losses and loss adjustment expenses are based upon estimates of the ultimate claim costs associated with property and casualty claim occurrences as of the balance sheet dates including estimates for IBNR claims. Considerable judgment is required to evaluate claims and establish estimated claim liabilities, particularly with respect to certain casualty or liability claims, which are typically reported over long periods of time and subject to changing judicial notions. The delay in claim reporting is exacerbated in reinsurance of liability or casualty claims as claim reporting by ceding companies is also delayed by contract terms.

Dollar amounts in thousands except for amounts per share

Following is a summary of liabilities for unpaid losses and loss adjustment expenses for each of the past three years:

	<u>2007</u>	<u>2006</u>	<u>2005</u>
Gross liabilities at beginning of year	\$78,310	\$61,980	\$56,162
Less ceded liabilities*	<u>(11,628)</u>	<u>(6,142)</u>	<u>(1,880)</u>
Net balance at beginning of year	<u>66,682</u>	<u>55,838</u>	<u>54,282</u>
Incurred losses recorded during year —			
For current year	35,392	30,923	21,507
For all prior years	<u>(7,115)</u>	<u>422</u>	<u>(35)</u>
Total incurred losses	<u>28,277</u>	<u>31,345</u>	<u>21,472</u>
Payments made during year —			
For current year	9,255	7,925	7,234
For all prior years	<u>15,362</u>	<u>12,576</u>	<u>12,682</u>
Total payments	<u>24,617</u>	<u>20,501</u>	<u>19,916</u>
Net liabilities at end of year	70,343	66,682	55,838
Plus ceded liabilities*	<u>23,502</u>	<u>11,628</u>	<u>6,142</u>
Gross liabilities at end of year	<u>\$93,845</u>	<u>\$78,310</u>	<u>\$61,980</u>

* Represents principally, Wes-FIC's proportionate share of reinsurance purchased by the aviation pools.

Incurred losses "for all prior years," commonly known as "reserve development," represents the net amount of estimation error charged (credited) to earnings with respect to the liabilities established as of the beginning of the year. Reference is made to Note 11, Business Segment Data, for a summary of the principal insurance activities in which Wesco's insurance segment has engaged in the past three years. During 2007, \$7.1 million of net favorable reserve development was recorded, and included \$3.6 million attributable to primary insurance and reflected, most notably, the reversal, following a favorable court decision, of a \$1.9 million loss recorded in 2005. The 2007 favorable reserve development also included \$3.2 million attributable to aviation-related reinsurance. During 2006, net adverse reserve development of \$422 was attributed principally to \$1,703 of unfavorable loss development of aviation-related reinsurance, partially offset by favorable development of \$1,284 for a contract whose coverage period ended in 1989. During 2005, net favorable reserve development of \$35 was credited to income and was attributed to \$683 of favorable loss development of aviation-related reinsurance, less unfavorable development of \$648 relating to primary insurance.

Note 7. Notes Payable and Other Contractual Obligations

Following is a summary of notes payable, at year end:

	<u>December 31,</u>	
	<u>2007</u>	<u>2006</u>
Revolving credit facility	\$37,000	\$38,000
Other	<u>200</u>	<u>200</u>
	<u>\$37,200</u>	<u>\$38,200</u>

The credit facility, used in the furniture rental business, totals \$100,000 and is unsecured. The weighted average annual interest rate on amounts outstanding under the revolving credit facility at yearend 2007 was 5.35% in addition to an annual commitment fee of .075% of the total credit facility. The underlying agreement does not contain any materially restrictive covenants, and is guaranteed by Berkshire. The credit

Dollar amounts in thousands except for amounts per share

facility expires in June 2011. In addition to the \$37,000 of loans outstanding at December 31, 2007, the business was contingently liable with respect to letters of credit totaling \$8,875.

Estimated fair values of the notes payable at yearend 2007 and 2006 approximated carrying values of \$37,200 and \$38,200.

In addition to recorded liabilities, Wesco at yearend 2007 had operating lease obligations aggregating \$103,852 (payable in 2008, \$25,925; in 2009, \$22,105; in 2010, \$18,604; in 2011, \$13,772; in 2012, \$9,234; and thereafter, \$14,212) and other contractual obligations aggregating \$34,409. Rent expense amounted to \$29,075, \$29,570, and \$28,503 for 2007, 2006, and 2005.

Note 8. Income Taxes

Following is a breakdown of income taxes payable at 2007 and 2006 yearends:

	December 31,	
	<u>2007</u>	<u>2006</u>
Deferred tax liabilities, relating to —		
Appreciation of investments	\$205,911	\$186,553
Cost basis differences in investments	116,368	116,368
Other items	43,150	40,004
	<u>365,429</u>	<u>342,925</u>
Deferred tax assets	<u>(21,483)</u>	<u>(20,353)</u>
Net deferred tax liabilities	343,946	322,572
Taxes currently payable	<u>3,470</u>	<u>32,827</u>
Income taxes payable	<u>\$347,416</u>	<u>\$355,399</u>

The consolidated statement of income contains a provision (benefit) for income taxes, as follows:

	<u>2007</u>	<u>2006</u>	<u>2005</u>
Federal	\$50,165	\$43,251	\$141,406
State	<u>1,600</u>	<u>1,982</u>	<u>(181)</u>
Provision for income taxes	<u>\$51,765</u>	<u>\$45,233</u>	<u>\$141,225</u>
Current	\$50,272	\$46,871	\$ 38,816
Deferred	<u>1,493</u>	<u>(1,638)</u>	<u>102,409</u>
Provision for income taxes	<u>\$51,765</u>	<u>\$45,233</u>	<u>\$141,225</u>

Following is a reconciliation of the statutory federal income tax rate with the effective income tax rate resulting in the provision for income taxes appearing on the consolidated statement of income:

	<u>2007</u>	<u>2006</u>	<u>2005</u>
Statutory Federal income tax rate	35.0%	35.0%	35.0%
Decrease resulting from —			
Dividends received deduction	(4.2)	(1.1)	(0.9)
State income taxes, less Federal tax benefit	(0.1)	(0.2)	(0.1)
Other differences, net	<u>1.5</u>	<u>(0.7)</u>	<u>(1.6)</u>
Effective income tax provision rate	<u>32.2%</u>	<u>33.0%</u>	<u>32.4%</u>

In July 2006, the Financial Accounting Standards Board (the "FASB") issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes — an interpretation of FASB Statement No. 109* ("FIN 48"),

Dollar amounts in thousands except for amounts per share

which clarifies the accounting for uncertainty of income tax positions taken or expected to be taken in income tax returns when it is more likely than not that an examination of a company's tax returns will result in the assessment of additional taxes. FIN 48 requires the recognition in the financial statements of the impact of the tax position based on the technical merits of the position, as well as expanded disclosure, if applicable, in the notes to the company's financial statements, beginning in 2007. In connection with the implementation of FIN 48, a company is also required to adjust its opening retained earnings balance for the aggregate impact of the uncertain tax positions that existed as of that date. Wesco's implementation of the provisions of FIN 48 had no material impact on the accompanying consolidated financial statements, and there were no matters of significance to report.

Consolidated Federal income tax return liabilities have been settled with the Internal Revenue Service (the "IRS") through 1998. The IRS has completed its audit of the tax returns for the years 1999 through 2004 and has proposed adjustments to increase the tax liabilities related to Wesco for the years 1999-2001. The examination is in the IRS' appeals process. Wesco management believes that the ultimate outcome of the Federal income tax audits for the years 1999 through 2001 will not materially affect Wesco's consolidated financial statements. Included in the 2007 income tax provision is a credit of \$179 representing interest received from the IRS during the year.

Note 9. Environmental Matters and Litigation

Federal and state environmental agencies have made claims relating to alleged contamination of soil and groundwater with trichloroethylene and perchloroethylene against Precision Brand Products ("PBP"), whose results, like those of its parent, Precision Steel, are included in Wesco's industrial segment, and various other businesses situated in an industrial park in Downers Grove, Illinois. PBP, along with the other businesses, have been negotiating remedial actions with various governmental entities.

PBP, Precision Steel, and other parties were also named in several civil lawsuits relating to the foregoing matter. Each of these civil lawsuits was settled with the plaintiffs in 2007 for amounts that are not material to Wesco.

Muniz v. Precision Brand Products, Inc., et. al., was a class action lawsuit in the U.S. District Court for the Northern District of Illinois alleging diminution of property values. It was settled in the first quarter of 2007 for a total of \$15,750. PBP's share of that amount was \$1,812.

Bendik v. Precision Brand Products, Inc. and Precision Steel Warehouse, Inc. was a state court claim in the Circuit Court of Cook County, Illinois in which the plaintiff alleged that exposure to contaminants allegedly released by PBP and Precision Steel caused her to contract cancer. The case was settled in the third quarter of 2007 for \$2,662. PBP's and Precision Steel's share of that amount was \$600.

Pote v. Precision Brand Products, Inc. and Precision Steel Warehouse, Inc. was a wrongful death action brought in the same court as the Bendik matter alleging that soil and groundwater contaminants from the industrial park were responsible for Mr. Pote's death. The case was settled in the second quarter of 2007 for \$1,250. PBP's and Precision Steel's share of that amount was \$77.

PBP and Precision Steel are in various stages of negotiations with their insurers, who undertook the cost of their defenses and agreed to indemnify them within the policy limits in connection with these matters, but have reserved their rights retroactively to decline coverage and receive reimbursement of amounts paid.

Included in other liabilities on the accompanying consolidated balance sheet is \$935 as of December 31, 2007, representing the remaining unpaid balance as of that date, resulting from provisions previously recorded, representing PBP's estimated share of costs of ongoing remediation in connection with the actions referred to above. Management anticipates that additional provisions with respect to such remediation and related legal matters may be required in the future, and expects that the insurers will continue to provide defenses and reimbursement of some of the costs previously recorded. However, as of December 31, 2007, it was not possible to reasonably estimate the amount, if any, of additional loss or a range of losses that may be required in connection with these matters, or any related benefit from insurance indemnification. Although it

Dollar amounts in thousands except for amounts per share

is not expected that the ultimate impact of such future costs will be material in relation to Wesco's shareholders' equity, the effect on industrial segment and consolidated net income in any given period could be material.

Note 10. Quarterly Financial Information

Unaudited quarterly consolidated financial information for 2007 and 2006 follows:

	Quarter Ended				Total For Year
	March 31,	June 30,	September 30,	December 31,	
2007					
Revenues	<u>\$150,681</u>	<u>\$156,256</u>	<u>\$156,664</u>	<u>\$167,323</u>	<u>\$630,924</u>

None					

Note 11. Business Segment Data

Wesco's reportable business segments are organized in a manner that reflects how management views those business activities. The financial information that follows shows data of reportable segments reconciled as needed to amounts reflected in the Consolidated Financial Statements.

The insurance segment includes the accounts of Wes-FIC and its subsidiary, KBS. Wes-FIC is engaged in the property and casualty insurance and reinsurance business. For the past three years its reinsurance business has consisted of participation with the Berkshire Insurance Group in several pools of aviation-related risks. The figures relating to these reinsurance transactions, as well as to liabilities and reserve development in connection with these and other transactions with the Berkshire Insurance Group, are shown on the accompanying consolidated financial statements as affiliated business.

Wes-FIC has also participated through the Berkshire Insurance Group in several contracts for super-catastrophe reinsurance covering hurricane risks in Florida and catastrophic excess-of-loss risks of a major international reinsurer, in prior years. Because Wesco's board of directors desires that Wesco participate in insurance and reinsurance activities in which the Berkshire Insurance Group also participates, it has approved Wes-FIC's automatic acceptance of retrocessions of super-catastrophe reinsurance provided that the following guidelines are met: (1) in order not to delay the acceptance process, the retrocession is to be accepted without delay in writing in Nebraska by agents of Wes-FIC who are salaried employees of the Berkshire Insurance Group; (2) any ceding commission received by the Berkshire Insurance Group cannot exceed 3% of premiums; (3) Wes-FIC is to assume 20% or less of the total risk; (4) the Berkshire Insurance

Dollar amounts in thousands except for amounts per share

Group must retain at least 80% of the identical risk; and (5) the aggregate premiums from this type of business in any twelve-month period cannot exceed 10% of Wes-FIC's net worth.

KBS provides specialized insurance coverage mainly to small- and medium-sized banks in the Mid-western United States. In addition to generating insurance premiums, Wesco's insurance segment derives dividend and interest income from the investment of float (premiums received before payment of related claims and expenses) as well as earnings retained and reinvested.

Payments of dividends by insurance subsidiaries are restricted by insurance statutes and regulations. Without prior regulatory approval, Wesco's insurance subsidiaries may pay up to approximately \$261,924 as ordinary dividends during 2007.

Combined shareholders' equity of Wes-FIC and KBS determined pursuant to statutory accounting rules ("statutory surplus") was approximately \$2,512,000 at December 31, 2007 and \$2,344,000 at December 31, 2006. Statutory surplus differs from the corresponding amount determined on the basis of GAAP. The major differences between statutory basis accounting and GAAP are that deferred policy acquisition costs, unrealized gains and losses on investments in securities with fixed maturities and related deferred income taxes are recognized under GAAP but not for statutory reporting purposes. In addition, statutory accounting for goodwill of acquired businesses requires amortization of goodwill over 10 years, whereas under GAAP, goodwill is subject to periodic tests for impairment.

The furniture rental segment includes the operating accounts of CORT. CORT is a nation-wide provider of rental furniture, accessories and related services in the "rent-to-rent" segment of the furniture industry. It rents high-quality furniture to corporate and individual customers who desire flexibility in meeting their temporary office, residential or trade show furnishing needs and who typically do not seek to own such furniture. In addition, CORT sells previously rented furniture through company-owned clearance centers.

The industrial segment includes the operating accounts of Precision Steel and its subsidiaries. The Precision Steel group operates two service centers, which buy steel and other metals in the form of sheets or strips, cut these to order and sell them directly to a wide variety of industrial customers throughout the United States. The Precision Steel group also manufactures shim stock and other toolroom specialty items and sells them, along with hose clamps and threaded rod, nationwide, generally through distributors.

Wesco's consolidated realized net investment gains, most of which have resulted from sales of investments held by its insurance subsidiaries, and goodwill of acquired businesses, are shown separately as nonsegment items, consistent with the way Wesco's management evaluates the performance of its operating segments. Other items considered unrelated to Wesco's three business segments include principally (1) investments other than those held by Wes-FIC and KBS, together with related dividend and interest income, (2) commercial real estate, together with related revenues and expenses, (3) residential real estate development, and (4) the assets, revenues and expenses of the parent company.
